

UNIVERSITÄT ZU LÜBECK

Module Guide for the Study Path

Bachelor Computer Science 2012

1st semester

Programming (CS1000, Prog)	1
Introduction to Logics (CS1002-KP04, CS1002, Logik)	2
Operating systems (CS1100, BetriebSys)	4
Introduction to Medical Informatics (CS1300-KP04, CS1300, EMI)	5
Introduction to Bioinformatics (CS1400-KP04, CS1400, EinBioinfo)	7
Introduction to Robotics and Automation (CS1500-KP04, CS1500, ERA)	9
Introduction to Media Informatics (CS1600-KP04, CS1600, EinMedien)	11
Introduction to IT Security and Reliability (CS1700-KP04, CS1700, EinfSiZuv)	13
Linear Algebra and Discrete Structures 1 (MA1000-KP08, MA1000, LADS1)	15

2nd and 3rd semester

Fundamentals of Computer Engineering (CS1200, TGI)	17
--	----

2nd semester

Algorithms and Data Structures (CS1001-KP08, CS1001, AuD)	19
Basics of Multimedia Systems (CS1601-KP04, CS1601, MMTechnik)	21
Software Ergonomics (CS2200-KP04, CS2200, SoftErgo)	23
Linear Algebra and Discrete Structures 2 (MA1500-KP08, MA1500, LADS2)	25
Fundamentals of Physics (ME1500, GrundPhys)	27
Einführung in die Medizintechnik (ME1550, EinfMedtec)	28

3rd and 4th semester

Software Engineering I (CS2300, SWTech)	29
---	----

3rd semester

Theoretical Computer Science (CS2000-KP08, CS2000, TI)	31
Robotics (CS2500-KP04, CS2500, Robotik)	33
Interaction Design (CS2600, InterakDes)	35
Lab Course IT Security (CS3410, PraktSiZuv)	37
Basic Chemistry (LS1100-INF, ChemINF)	38
Analysis 1 (MA2000-KP08, MA2000, Ana1KP08)	39
Module Part: Course Anatomy (MZ2100 A, Anatomie)	41
Module Part: Course Pathology (MZ2100 B, Patho)	43

4th semester

Computer Architecture and Embedded Systems (CS2100, RAES)	45
Module part: Computer Architecture (CS2100 A, RA)	46
Module part: Embedded Systems (CS2100 B, EmbedSa)	47
Computer Networks (CS2150, CN)	48
Media Production and Media Programming (CS2601, MedienProd)	49
Databases (CS2700-KP04, CS2700, DB)	50
Programming Languages and Type Systems (CS3052-KP04, CS3052, ProgLan14)	52
Artificial Intelligence 1 (CS3204-KP04, CS3204, KI1)	54
Informatics in Health Care - eHealth (CS3300, eHealth)	56
Biology (LS2500-KP04, LS2500, Bio)	57
Analysis 2 (MA2500-KP04, MA2500, Ana2KP04)	59
Stochastics 1 (MA2510-KP04, MA2510, Stoch1)	61

5th or 6th semester

Parallel Computing (CS3051-KP04, CS3051, ParallelVa)	63
Programming Languages and Type Systems (CS3052-KP04, CS3052, ProgLan14)	52
Computer-Aided Design of Digital Circuits (CS3110-KP04, CS3110, SchaltEntw)	65
Electronics and Microsystems (CS3120, EIMi)	67
Nonstandard Database Systems (CS3202-KP04, CS3202, NDB)	69
Image processing (CS3203, Bildverarb)	71
Artificial Intelligence 1 (CS3204-KP04, CS3204, KI1)	54
Computer Graphics (CS3205-KP04, CS3205, CompGrafik)	72
Numerics 1 (MA3110-KP04, MA3110, Num1KP04)	74
Graph Theory (MA3445-KP04, MA3445, Graphen)	76

5th semester

Robotics (CS2500-KP04, CS2500, Robotik)	33
Interaction Design (CS2600, InterakDes)	35
Algorithm Design (CS3000-KP04, CS3000, AlgoDesign)	78
Signal processing (CS3100-KP04, SignalV)	80
Electronics and Microsystems (CS3120, EIMi)	67
Software Engineering II (CS3200, SWEng)	82
Image and Signal Processing in Medicine 1 (CS3310-INF, MBS)	83
Seminar Data Security (CS3400-KP04, CS3400, SemDatensi)	84
Lab Course Robotics and Automation (CS3501-KP04, CS3501, PraktRob)	86
Lab class media and interaction design (CS3600, PrakMedien)	88
Bachelor Seminar Informatics (CS3702-KP04, CS3702, BachSemInf)	89
Molecular Genetics (LS3100, MolGen)	90

Statistics - Practical Course (MA3210, StatPrakt)	91
Biomathematics (MA3400-KP04, MA3400, Biomathe)	93
Presentation and Documentation (PS3700, PundD)	95

6th semester

Basics of Multimedia Systems (CS1601-KP04, CS1601, MMTechnik)	21
Usability Engineering (CS3201-KP04, CS3201, UsabUXEng)	96
Image processing (CS3203, Bildverarb)	71
Bachelor Project Computer Science (CS3701, BacProjInf)	98
Bachelor Thesis Computer Science (CS3990-KP15, CS3990, BScInf)	99
Dependability of Computing Systems (CS4172-KP04, CS4172, ZuverlRSys)	100
Security in Networks and Distributed Systems (CS4180-KP04, CS4180, SicherNet)	102
Biostatistics 1 (MA1600-KP04, MA1600, MA1600-MML, BioStat1)	104

CS1000 - Programming (Prog)		
Duration: 1 Semester	Turnus of offer: each winter semester	Credit points: 8
Course of study, specific field and term: <ul style="list-style-type: none"> • Bachelor Medical Informatics 2011 (compulsory: aptitude test), computer science, 1st semester • Bachelor MES 2011 (compulsory), foundations of computer science, 3rd semester • Bachelor Computer Science 2012 (compulsory: aptitude test), computer science, 1st semester 		
Classes and lectures: <ul style="list-style-type: none"> • Programming (lecture, 4 SWS) • Programming (exercise, 2 SWS) 	Workload: <ul style="list-style-type: none"> • 125 Hours private studies • 90 Hours in-classroom work • 25 Hours exam preparation 	
Contents of teaching: <ul style="list-style-type: none"> • Definition: Algorithm • Basic concepts of imperative and OO programming • Basic data structures • Abstract Data types 		
Qualification-goals/Competencies: <ul style="list-style-type: none"> • Understanding the nature of algorithms and their definition • Basic knowledge about different programming paradigms (imperative, declarative, object-oriented, etc.) • Profound knowledge about imperative and object-oriented programming • Ability to define abstract data types • In-depth knowledge of the Java programming language • Ability to design, to implement, and to test simple programs • Expertise to solve bigger programming tasks efficiently and timely using the acquired competences • Learn to come up with solutions that satisfy accepted quality standards while operating with constrained resources in terms of time, man-power, etc. • Ability to introduce new informatic or mathematical methods to products to be developed or existing solutions • Basic understanding of product development in enterprises 		
Grading through: <ul style="list-style-type: none"> • written exam 		
Is requisite for: <ul style="list-style-type: none"> • Algorithms and Data Structures (CS1001-KP08, CS1001) 		
Responsible for this module: <ul style="list-style-type: none"> • Prof. Dr. Stefan Fischer

CS1002-KP04, CS1002 - Introduction to Logics (Logik)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Media Informatics 2020 (compulsory), computer science, 2nd semester
- Bachelor Computer Science 2019 (compulsory), foundations of computer science, 2nd semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (compulsory), computer science, 2nd semester
- Bachelor Media Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2016 (compulsory), foundations of computer science, 3rd semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (compulsory), computer science, 2nd semester
- Bachelor Medical Informatics 2014 (compulsory), computer science, 3rd semester
- Bachelor Computer Science 2014 (compulsory), foundations of computer science, 3rd semester
- Bachelor Medical Informatics 2011 (compulsory), computer science, 1st semester
- Bachelor MES 2011 (optional subject), computer science, 3rd semester
- Bachelor CLS 2010 (optional subject), computer science, 6th semester
- Bachelor Computer Science 2012 (compulsory), foundations of computer science, 1st semester
- Bachelor Biophysics 2024 (optional subject), computer science, 6th semester

Classes and lectures:

- Introduction to Logic (lecture, 2 SWS)
- Introduction to Logic (exercise, 1 SWS)

Workload:

- 65 Hours private studies and exercises
- 45 Hours in-classroom work
- 10 Hours exam preparation

Contents of teaching:

- Key concepts of syntax: alphabet, string, term, formula
- Key concepts of semantics: assignment, structure, model
- Key concepts of proof calculus: axioms, proofs
- Formalization and coding of problems
- Validating correctness and satisfiability of formalizations
- Syntax and semantics of propositional logic
- Syntax and semantics of predicate logic
- Proof calculus

Qualification-goals/Competencies:

- Students are able to explain the concepts of syntax and semantics for the examples of propositional and predicate logic
- They are able to apply formal systems and proof systems
- They are able to transfer methods of mathematical logic to simple practical problems
- They are able to formalize discrete problems
- They are able to modify proof templates in order to create simple proofs

Grading through:

- written exam

Responsible for this module:

- [Prof. Dr. rer. nat. Till Tantau](#)

Teacher:

- [Institute for Theoretical Computer Science](#)
- [Prof. Dr. rer. nat. Till Tantau](#)
- [Prof. Dr. Rüdiger Reischuk](#)

Literature:

- Uwe Schöning: Logik für Informatiker - Spektrum Verlag, 1995

- Kreuzer, Kühlig: Logik für Informatiker - Pearson Studium, 2006

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful completion of exercise slips as specified at the beginning of the semester.

Module Exam(s):

- CS1002-L1: Introduction to Logic, portfolio exam: a total of 70 points for written exercises down during the course of the semester, 30 points for the written exam at the end. The grade is calculated as follows: 50 to 54 points for a 4.0, then 55 to 59 points for a 3.7 and so on until the end 95 to 100 points for a 1.0.

CS1100 - Operating systems (BetriebSys)		
Duration: 1 Semester	Turnus of offer: on request	Credit points: 4
Course of study, specific field and term: <ul style="list-style-type: none"> • Bachelor Medical Informatics 2011 (optional subject), computer science, 4th to 6th semester • Bachelor Computer Science 2012 (compulsory), foundations of computer science, 1st semester 		
Classes and lectures: <ul style="list-style-type: none"> • Operating Systems (lecture, 2 SWS) • Operating Systems (exercise, 1 SWS) 	Workload: <ul style="list-style-type: none"> • 65 Hours private studies • 45 Hours in-classroom work • 10 Hours exam preparation 	
Contents of teaching: <ul style="list-style-type: none"> • Tasks and Structure • Historical Overview of Computer and Operating Systems • Coding of Symbols and Numbers • Foundations of Operating Systems • Processes, Inter-Process Communication and Process Management • Storage Management • Input / Output • Files and File Systems • Examples (UNIX, Windows, mobile OS) 		
Qualification-goals/Competencies: <ul style="list-style-type: none"> • Students know about the main concepts of operating systems. • Students are able to judge, which OS concepts can be appropriately applied to novel computing architectures. • Students are able to apply the most important strategies and algorithms for operating systems. 		
Grading through: <ul style="list-style-type: none"> • written exam 		
Responsible for this module: <ul style="list-style-type: none"> • Prof. Dr. Stefan Fischer Teacher: <ul style="list-style-type: none"> • Institute of Telematics • Prof. Dr. Stefan Fischer • Prof. Dr.-Ing. Andreas Schrader 		
Literature: <ul style="list-style-type: none"> • Andrew S. Tanenbaum: Moderne Betriebssysteme - 3., aktualisierte Auflage, Pearson, April 2009 		
Language: <ul style="list-style-type: none"> • offered only in German 		

CS1300-KP04, CS1300 - Introduction to Medical Informatics (EMI)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Computer Science 2019 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), medical computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (compulsory: aptitude test), medical computer science, 1st semester
- Bachelor Computer Science 2016 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2014 (compulsory: aptitude test), medical computer science, 1st semester
- Bachelor Medical Informatics 2011 (compulsory: aptitude test), medical computer science, 1st semester
- Bachelor CLS 2010 (optional subject), computer science, 5th semester
- Bachelor MES 2011 (compulsory), foundations of computer science, 3rd semester
- Bachelor Computer Science 2012 (compulsory), specialization field medical informatics, 1st semester
- Bachelor IT-Security 2016 (optional subject), interdisciplinary, Arbitrary semester

Classes and lectures:

- Introduction to Medical Informatics (lecture, 2 SWS)
- Introduction to Medical Informatics (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Basic concepts and methods of medical informatics
- Overview of the occupational field in medical informatics
- Introduction to the German healthcare system
- Introduction to medical documentation, including patient record
- Information systems in the healthcare sector
- Conceptual systems in medicine (classifications, terminologies)
- Medical informatics in clinical practice
- Principles of medical imaging: X-ray, ultrasound, CT, MRI
- Fundamentals of medical image computing and visualisation
- Medical sensor data analysis
- Medical decision support for diagnostics and therapy
- Health telematics
- Medical data security

Qualification-goals/Competencies:

- Students know the fundamental terms and selected methods in the area of medical informatics.
- They know the main features of the German healthcare system.
- They are able to formulate the objectives and types of medical documentation including the electronic health record.
- They know the requirements for clinical information systems.
- They are able to formulate SQL queries and apply them to relational databases.
- They are able to explain the principles of medical imaging.
- They are able to explain the fundamentals of medical image processing and visualisation.
- They know selected application scenarios in the area of medical sensor data analysis.
- They know selected approaches for medical decision support.

Grading through:

- written exam

Responsible for this module:

- [Prof. Dr. rer. nat. habil. Heinz Handels](#)

Teacher:

- [Institute of Medical Informatics](#)
- [Prof. Dr. rer. nat. habil. Heinz Handels](#)

- Prof. Dr. rer. nat. habil. Josef Ingenerf
- Prof. Dr.-Ing. Marcin Grzegorzek

Literature:

- Th. Lehmann: *Handbuch der Medizinischen Informatik - 2nd Edition, München: Hanser 2004*
- P. Haas: *Medizinische Informationssysteme und Elektronische Krankenakten - Berlin: Springer 2005*
- F. Leiner, W. Gaus, R. Haux: *Medizinische Dokumentation - 4th Edition, Stuttgart: Schattauer 2003*

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful completion of exercise slips as specified at the beginning of the semester
- Giving a short lecture as specified at the beginning of the semester

Module examinations:

- CS1300-L1: Introduction to Medical Informatics, written exam, 90min, 100% of module grade

CS1400-KP04, CS1400 - Introduction to Bioinformatics (EinBioinfo)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor IT-Security 2016 (optional subject), interdisciplinary, Arbitrary semester
- Bachelor Nutritional Medicine 2024 (compulsory), mathematics / computer science, 5th semester
- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 5th semester
- Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization Bioinformatics and Systems Biology, 1st semester
- Bachelor Computer Science 2019 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor MLS 2018 (compulsory), life sciences, 5th semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Computer Science 2016 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization Bioinformatics, 1st semester
- Bachelor MLS 2016 (compulsory), life sciences, 5th semester
- Bachelor Medical Informatics 2014 (compulsory), medical computer science, 3rd semester
- Bachelor Computer Science 2014 (compulsory), specialization field bioinformatics, 1st semester
- Bachelor Medical Informatics 2011 (compulsory), medical computer science, 3rd semester
- Bachelor MLS 2009 (compulsory), life sciences, 5th semester
- Bachelor CLS 2010 (compulsory), specialization field bioinformatics, 5th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 3rd or 5th semester
- Bachelor Computer Science 2012 (compulsory), specialization field bioinformatics, 1st semester
- Bachelor Biophysics 2024 (optional subject), computer science, 5th semester

Classes and lectures:

- Introduction to Bioinformatics (lecture, 2 SWS)
- Introduction to Bioinformatics (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Life, Evolution & the Genome
- Sequence assembly - Industrial reading of genetic information
- DNA sequence models & hidden markov models
- Viterbi-Algorithm
- Sequence alignment & dynamic programming
- Unsupervised data analysis (k-means, PCA, ICA)
- DNA microarrays & GeneChip technologies

Qualification-goals/Competencies:

- Students are able to explain the basic concepts of coding, transcription and translation of information in living beings.
- They are able to explain how a solution of the shortest common superstring problem can be estimated with a simple greedy algorithm.
- They are able to create a Markov chain or a Hidden Markov Model (HMM) for a given modelling problem.
- They are able to give examples on how to solve a problem using dynamic programming.
- They are able to implement the introduced algorithms (in Matlab)
- They are able to use unsupervised learning methods and they are able to interpret the results.
- They are able to explain basic Microarray-and DNA-Chip-Technologies.

Grading through:

- portfolio exam

Responsible for this module:

- Prof. Dr. rer. nat. Amir Madany Mamlouk

Teacher:

- [Institute for Neuro- and Bioinformatics](#)
- Prof. Dr. rer. nat. Amir Madany Mamlouk

- M. S. Waterman: Introduction to Computational Biology - Chapman and Hall, 1995

Language:

- offered only in German

Notes:

For students of the master programme Infection Biology, this is not a stand-alone module, but rather part of the module CS4011.

Prerequisites for attending the module:

- None

Computer Science students get a B certificate.

CS1500-KP04, CS1500 - Introduction to Robotics and Automation (ERA)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor IT-Security 2016 (optional subject), interdisciplinary, Arbitrary semester
- Bachelor Biophysics 2024 (compulsory), Elective Computer Science, 5th semester
- Bachelor Computer Science 2019 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor Robotics and Autonomous Systems 2020 (compulsory), Robotics and Autonomous Systems, 1st semester
- Bachelor Medical Informatics 2019 (optional subject), medical computer science, 4th to 6th semester
- Bachelor Computer Science 2016 (optional subject), Introductory Module Computer Science, 1st semester
- Bachelor Biophysics 2016 (compulsory), Elective Computer Science, 5th semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory), Robotics and Autonomous Systems, 1st semester
- Bachelor Medical Informatics 2014 (optional subject), medical computer science, 5th or 6th semester
- Bachelor Computer Science 2014 (compulsory), specialization field robotics and automation, 1st semester
- Bachelor CLS 2010 (optional subject), computer science, 5th or 6th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 5th semester
- Bachelor Computer Science 2012 (compulsory), specialization field robotics and automation, 1st semester

Classes and lectures:

- Introduction to Robotics and Automation (lecture, 2 SWS)
- Introduction to Robotics and Automation (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Introduction
- Control systems
- Programmable Logic Controller (PLC)
- Combinatorial control
- Sequential control
- Feedback control systems
- Plants
- PID controller
- Controller parameterization
- Autonomous mobile robots
- AI-paradigms
- Elementary and emergent behaviors
- Signal acquisition and processing
- Actuators
- According to the rules of GSP of the UzL

Qualification-goals/Competencies:

- The students are able to explain the principles of control systems.
- The students are able to design combinatorial and sequential control systems.
- The students are able to program simple application problems as PLC-program in the IEC-languages.
- The students are able to analyze closed-loop controlled systems (plants) and to select and parameterize a suitable feedback PID controller.
- The students are able to present the principal structure and functionality of autonomous wheel-driven robots.
- The students are able to program simple autonomous robots in a behavior-based way..

Grading through:

- written exam

Responsible for this module:

- [Prof. Dr.-Ing. Mladen Berekovic](#)

Teacher:

- [Institute of Computer Engineering](#)

- Dr. rer. nat. Javad Ghofrani

Literature:

- J. L. Jones, D. Roth: Robot Programming - A Practical Guide to Behavior-Based Robotics - New York: Mc Graw Hill 2004
- J. Knespl: Automatisierungstechnik 1 - Regelungstechnik - Köln: Stam-Verlag 1999
- R. R. Murphy: Introduction to AI Robotics - Cambridge, MA: The MIT Press 2000
- G. Wellenreuther, D. Zastrow: Automatisieren mit SPS - Theorie und Praxis - Braunschweig: Vieweg 2008

Language:

- offered only in German

Notes:

-Computer Science students are issued a B certificate, after having finished entire assignments including the tests and having passed the written exam at the end of the term.

Students of other majors are issued an A-certificate after having passed the written exam.

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Successful completion of homework assignments during the semester.

Written exam:

-CS1500-L1: Introduction to Robotics and Automation, written exam, 60 - 120 min, 100% modul grade.

CS1600-KP04, CS1600 - Introduction to Media Informatics (EinMedien)

Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Media Informatics 2020 (compulsory: aptitude test), media informatics, 1st semester
- Bachelor Media Informatics 2014 (compulsory: aptitude test), media informatics, 1st semester
- Bachelor CLS 2010 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2012 (compulsory), specialization field media informatics, 1st semester
- Bachelor IT-Security 2016 (optional subject), interdisciplinary, Arbitrary semester

Classes and lectures:

- Introduction to Media Informatics (lecture, 2 SWS)
- Introduction to Media Informatics (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Overview of the lecture
- Social context
- Terms and theories of media
- Milestones of media technology
- Interactive media technologies
- Multimedia applications
- Human-centered media
- Designing interactive media
- Development processes for interactive media
- Ethics of new media
- Summary

Qualification-goals/Competencies:

- The students know the structure and the most important contents of media informatics.
- They are prepared for the following media informatics lectures.
- They know the main tasks and fields of work in media informatics.
- They know the challenges and requirements of designing interactive multimedia systems.

Grading through:

- Oral examination

Is requisite for:

- Interaction Design and User Experience (CS2600-KP08, CS2600SJ14)

Responsible for this module:

- [Prof. Dr.-Ing. Nicole Jochems](#)

Teacher:

- [Institute for Multimedia and Interactive Systems](#)
- [Prof. Dr.-Ing. Nicole Jochems](#)

Literature:

- :

Language:

- offered only in German

Notes:

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Successful completion of project work as stated at the beginning of the semester

Exam(s):

- CS1600-L1: Einführung in die Medieninformatik, Klausur, 90min, 100% der Modulnote

CS1700-KP04, CS1700 - Introduction to IT Security and Reliability (EinfSiZuv)		
Duration: 1 Semester	Turnus of offer: each winter semester	Credit points: 4 (Typ B)
Course of study, specific field and term: <ul style="list-style-type: none"> • Bachelor Computer Science 2019 (optional subject), Introductory Module Computer Science, 1st semester • Bachelor Medical Informatics 2019 (optional subject), computer science, 4th to 6th semester • Bachelor Computer Science 2016 (optional subject), Introductory Module Computer Science, 1st semester • Bachelor IT-Security 2016 (compulsory), IT-Security, 1st semester • Bachelor Medical Informatics 2014 (optional subject), computer science, 5th or 6th semester • Bachelor Computer Science 2014 (compulsory), specialization field IT security and safety, 1st semester • Bachelor Computer Science 2012 (compulsory), specialization field IT security and safety, 1st semester 		
Classes and lectures: <ul style="list-style-type: none"> • Introduction to IT Security and Reliability (lecture, 2 SWS) • Introduction to IT Security and Reliability (exercise, 1 SWS) 		Workload: <ul style="list-style-type: none"> • 55 Hours private studies • 45 Hours in-classroom work • 20 Hours exam preparation
Contents of teaching: <ul style="list-style-type: none"> • introduction and terms • data protection and data security, informational self-determination • classification of security, safety and reliability requirements and risks • insecure systems: examples, impacts and damages, causes • unreliable systems: examples, impacts and damages, causes • attack scenarios, safety-critical businesses and domains • simple measures for enhancing safety, security and reliability, risk estimation • legal, social and ethical aspects 		
Qualification-goals/Competencies: <ul style="list-style-type: none"> • Students can explain the basic problems in the area of security and reliability of IT systems. • They can use simple standard methods to analyze and classify such problems. • They can evaluate social aspects of IT security and reliability issues. 		
Grading through: <ul style="list-style-type: none"> • Written or oral exam as announced by the examiner 		
Responsible for this module: <ul style="list-style-type: none"> • Prof. Dr. Thomas Eisenbarth 		
Teacher: <ul style="list-style-type: none"> • Institute of Computer Engineering • Institute for IT Security • Institute of Software Technology and Programming Languages • Institute for Theoretical Computer Science • Prof. Dr.-Ing. Mladen Berekovic • Prof. Dr. Martin Leucker • Prof. Dr. Esfandiar Mohammadi • Prof. Dr. Rüdiger Reischuk • Prof. Dr. Thomas Eisenbarth 		
Literature: <ul style="list-style-type: none"> • :- current introductory literature will be introduced in the respective lectures 		
Language: <ul style="list-style-type: none"> • German and English skills required 		
Notes:		

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful completion of exercise sheets as specified at the beginning of the semester.

Module Exam(s):

- CS1700 -L1 Introduction to IT Security and Reliability, written exam, 90min, 100% of the (non-existent) module grade.

(Proportion of exercise Institute for IT Security: 100%)

MA1000-KP08, MA1000 - Linear Algebra and Discrete Structures 1 (LADS1)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

8

Course of study, specific field and term:

- Minor in Teaching Mathematics, Bachelor of Arts 2023 (compulsory), mathematics, 3rd semester
- Bachelor CLS 2023 (compulsory), mathematics, 1st semester
- Bachelor Biophysics 2024 (compulsory), mathematics, 1st semester
- Bachelor Biophysics 2024 (compulsory), mathematics, 1st semester
- Bachelor MES 2020 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Media Informatics 2020 (compulsory), mathematics, 3rd semester
- Bachelor Computer Science 2019 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Robotics and Autonomous Systems 2020 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Medical Informatics 2019 (compulsory: aptitude test), mathematics, 1st semester
- Minor in Teaching Mathematics, Bachelor of Arts 2017 (compulsory), mathematics, 3rd semester
- Bachelor Computer Science 2016 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor CLS 2016 (compulsory), mathematics, 1st semester
- Bachelor IT-Security 2016 (compulsory), mathematics, 1st semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Biophysics 2016 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Medical Informatics 2014 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor MES 2014 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Media Informatics 2014 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Computer Science 2014 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Medical Informatics 2011 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Computer Science 2012 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor MES 2011 (compulsory), mathematics, 1st semester
- Bachelor CLS 2010 (compulsory), mathematics, 1st semester

Classes and lectures:

- Linear Algebra and Discrete Structures 1 (lecture, 4 SWS)
- Linear Algebra and Discrete Structures 1 (exercise, 2 SWS)

Workload:

- 125 Hours private studies and exercises
- 90 Hours in-classroom work
- 25 Hours exam preparation

Contents of teaching:

- Fundamentals: logic, sets, mappings
- Relations, equivalence relations, orderings
- Proof by induction
- Groups: fundamentals, finite groups, permutations, matrices
- Rings, fields, congruencies
- Complex numbers: calculus, representation, roots of unity
- Vector spaces: bases, dimension, scalar product, norms

Qualification-goals/Competencies:

- Students understand the fundamental concepts of linear algebra.
- They understand basic thought processes and methods of proof.
- They can explain fundamental relationships in linear algebra.
- They can apply fundamental concepts and methods of proof to algebraic problems.
- They have an understanding of abstract thought processes.
- Interdisciplinary qualifications:
- Students have basic competency in modelling.
- They can transfer fundamental theoretical concepts to similar applications.
- They can work on elementary mathematics problems within a team.
- They can present elementary solutions to their problems to a group.

Grading through:

- written exam

Is requisite for:

- Linear Algebra and Discrete Structures 2 (MA1500-KP08, MA1500)

Responsible for this module:

- [Prof. Dr. rer. nat. Jan Modersitzki](#)

Teacher:

- [Institute of Mathematics and Image Computing](#)
- [Prof. Dr. rer. nat. Jan Modersitzki](#)
- [Prof. Dr. rer. nat. Jan Lellmann](#)

Literature:

- G. Fischer: Lineare Algebra: Eine Einführung für Studienanfänger - Vieweg+Teubner
- G. Strang: Lineare Algebra - Springer
- K. Jänich: Lineare Algebra - Springer
- D. Lau: Algebra und diskrete Mathematik I + II - Springer
- G. Strang: Introduction to Linear Algebra - Cambridge Press
- K. Rosen: Discrete Mathematics and Its Applications - McGraw-Hill

Language:

- offered only in German

Notes:

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Successful completion of homework assignments during the semester
- Successful completion of e-tests during the semester
- Presentation of homework assignment

Module exam:

- MA1000-L1: Linear Algebra and Discrete Structures 1, written exam, 90 min, 100 % of module grade

CS1200 - Fundamentals of Computer Engineering (TGI)
Duration:

2 Semester

Turnus of offer:

each summer semester

Credit points:

12

Course of study, specific field and term:

- Bachelor MES 2011 (compulsory), foundations of computer science, 4th and 5th semester
- Bachelor Computer Science 2012 (compulsory), foundations of computer science, 2nd and 3rd semester

Classes and lectures:

- Fundamentals of Computer Engineering (lecture, 4 SWS)
- Fundamentals of Computer Engineering (exercise, 2 SWS)
- Fundamentals of Computer Engineering (practical course, 3 SWS)

Workload:

- 200 Hours private studies
- 135 Hours in-classroom work
- 25 Hours exam preparation

Contents of teaching:

- Boolean algebra
- Switching functions
- Minimization
- Combinational logic
- Sequential logic
- Register-transfer languages
- Data processing units
- Control units
- Microprogramming
- Basic processor architectures
- Microcontrollers
- Assembler programming
- I/O-interfaces
- Interrupts
- Semiconductor components
- Circuit families
- Integrated circuits
- Programmable logic
- CAD-tools
- Memory technologies

Qualification-goals/Competencies:

- Students know the most important methods for the formal description of digital circuits like Boolean algebra or register-transfer languages
- They are well acquainted with the basic design methods for digital circuits on gate and register-transfer level
- They have knowledge about basic processor architectures and their programming in machine language
- They are able to program microcontrollers for simple applications in assembly language
- They know the basic technologies for the realization of digital circuits (bipolar, MOS, CMOS)
- They are able to design simple digital circuits making use of CAD-tools, to implement and test them in different technologies (TTL, FPGAs etc.)

Grading through:

- written exam

Responsible for this module:

Language:

- offered only in German

CS1001-KP08, CS1001 - Algorithms and Data Structures (AuD)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

8

Course of study, specific field and term:

- Bachelor CLS 2023 (compulsory), foundations of computer science, 2nd semester
- Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Media Informatics 2020 (compulsory), computer science, 2nd semester
- Bachelor Computer Science 2019 (compulsory: aptitude test), foundations of computer science, 2nd semester
- Bachelor Robotics and Autonomous Systems 2020 (compulsory), computer science, 2nd semester
- Bachelor Medical Informatics 2019 (compulsory), computer science, 2nd semester
- Bachelor Computer Science 2016 (compulsory: aptitude test), foundations of computer science, 2nd semester
- Bachelor CLS 2016 (compulsory), foundations of computer science, 2nd semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory), computer science, 2nd semester
- Bachelor IT-Security 2016 (compulsory: aptitude test), computer science, 2nd semester
- Bachelor Medical Informatics 2014 (compulsory), computer science, 2nd semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 4th or 6th semester
- Bachelor Media Informatics 2014 (compulsory), foundations of computer science, 2nd semester
- Bachelor Computer Science 2014 (compulsory: aptitude test), foundations of computer science, 2nd semester
- Bachelor Medical Informatics 2011 (compulsory), computer science, 2nd semester
- Bachelor MES 2011 (compulsory), foundations of computer science, 4th semester
- Bachelor CLS 2010 (compulsory), foundations of computer science, 2nd semester
- Bachelor Computer Science 2012 (compulsory: aptitude test), foundations of computer science, 2nd semester

Classes and lectures:

- Algorithms and Data Structures (lecture, 4 SWS)
- Algorithms and Data Structures (exercise, 2 SWS)

Workload:

- 125 Hours private studies
- 90 Hours in-classroom work
- 25 Hours exam preparation

Contents of teaching:

- Sorting, algorithm analysis, heaps
- Distribution sort
- Priority queues
- Sets
- Sets
- Sets of strings
- Disjoint sets
- Associating objects
- Graphs
- Search graph for game playing
- Dynamic Programming principle, greedy algorithms
- Optimization problems, sequence alignment (longest common subsequence), knapsack problem, planning and layout problems, determining change coins, notion of completeness of algorithms
- String matching
- Hard problems
- Pruning and subgraph isomorphism
- Approximation

Qualification-goals/Competencies:

- The students can explain the central ideas, define the relevant concepts and explain the functioning of algorithms with help of application scenarios for all the items listed in contents of teaching.

Grading through:

- written exam

Is requisite for:

- Databases (CS2700-KP04, CS2700)
- Lab Course Software Engineering (CS2301-KP06, CS2301)

- Software Engineering (CS2300-KP06, CS2300SJ14)
- Theoretical Computer Science (CS2000-KP08, CS2000)
- Algorithm Design (CS3000-KP04, CS3000)

Requires:

- Introduction to Programming (CS1000-KP08, CS1000SJ14-MML/MI, CS1000SJ14-MIW)
- Introduction to Programming (CS1000-KP10, CS1000SJ14)

Responsible for this module:

- [Prof. Dr. rer. nat. habil. Ralf Möller](#)

Teacher:

- [Institute of Information Systems](#)
- [Prof. Dr. rer. nat. habil. Ralf Möller](#)

Literature:

- Thomas H. Cormen, Charles E. Leiserson, Ronald Rivest, Clifford Stein: *Algorithmen - Eine Einführung* - Oldenbourg Verlag, 2013

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None (The competencies of the modules listed under 'Requires' are needed for this module, but are not a formal prerequisite.)

Admission requirements for participation in module examination(s):

- Successful completion of exercise sheets as specified at the beginning of the semester.

Module exam(s):

- CS1001-L1: Algorithms and Data Structures, written exam, 90min, 100% of the module grade.

CS1601-KP04, CS1601 - Basics of Multimedia Systems (MMTechnik)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Biophysics 2016 (optional subject), computer science, 5th semester
- Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Media Informatics 2020 (compulsory), media informatics, 3rd semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), media informatics, 5th or 6th semester
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 4th or 6th semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Bachelor Media Informatics 2014 (compulsory), media informatics, 3rd semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 6th semester
- Bachelor CLS 2010 (optional subject), computer science, 6th semester
- Bachelor Computer Science 2012 (compulsory), specialization field media informatics, 2nd semester
- Bachelor Biophysics 2024 (optional subject), computer science, 5th semester

Classes and lectures:

- Basics of Multimedia Systems (lecture, 2 SWS)
- Basics of Multimedia Systems (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Sensation and Perception
- Analog Media Technology
- Digitalisation
- Digital Audio, Image and Video Technology
- Media storage (compression / formats)
- Media Transmission (Broadcast / Streaming)

Qualification-goals/Competencies:

- Students are able to present to essential functions and principles of multimedia systems.
- They are able to judge possibilities and limitations of human perception.
- They are able to classify the conditions and technologies for capturing, processing, storing, transmitting and perception of multimedia.
- They can balance the specific advantages and disadvantages of analog and digital media technology.
- They are able to apply appropriate technical components and processes for the design of multimedia systems.

Grading through:

- Written or oral exam as announced by the examiner

Responsible for this module:

- [Prof. Dr.-Ing. Andreas Schrader](#)

Teacher:

- [Institute of Telematics](#)
- [Prof. Dr.-Ing. Andreas Schrader](#)

Literature:

- Thomas Görne: Tontechnik - 4. Auflage, Hanser 2014
- Ulrich Schmidt: Professionelle Videotechnik - 6. Auflage, Springer 2013

Language:

- English, except in case of only German-speaking participants

Notes:

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful completion of exercise slips as specified at the beginning of the semester.

Module Exam(s):

- CS1601-L1 Fundamentals of Multimedia Technology, as determined by the instructor: Written exam, 90min, 100% of module grade OR oral exam, 100% of module grade.

CS2200-KP04, CS2200 - Software Ergonomics (SoftErgo)		
Duration: 1 Semester	Turnus of offer: each summer semester	Credit points: 4
Course of study, specific field and term: <ul style="list-style-type: none"> • Bachelor IT-Security 2016 (optional subject), specific, Arbitrary semester • Bachelor Media Informatics 2020 (compulsory), media informatics, 2nd semester • Bachelor Psychology 2016 (optional subject), computer science, Arbitrary semester • Bachelor Psychology 2013 (optional subject), computer science, Arbitrary semester • Bachelor Media Informatics 2014 (compulsory), media informatics, 2nd semester • Bachelor Medical Informatics 2011 (optional subject), software engineering, 4th to 6th semester • Bachelor Computer Science 2012 (compulsory), foundations of computer science, 2nd semester 		
Classes and lectures: <ul style="list-style-type: none"> • Software Ergonomics (lecture, 2 SWS) • Software Ergonomics (exercise, 1 SWS) 		Workload: <ul style="list-style-type: none"> • 55 Hours private studies • 45 Hours in-classroom work • 20 Hours exam preparation
Contents of teaching: <ul style="list-style-type: none"> • Motivation and introduction • Models of HCI • Modes of input & input devices • Modes of output & output devices • Time behavior of interactive systems • Graphical control elements • Usability and usability processes • Digital work 		
Qualification-goals/Competencies: <ul style="list-style-type: none"> • The students know the basic theories, models and criteria for user- and application-centered interactive multimedia systems. • They are able to transfer this knowledge into development processes and to evaluate interactive systems systematically. • They can describe work systems as well as applications in education and entertainment in a user- and task-centered way. 		
Grading through: <ul style="list-style-type: none"> • portfolio exam - the concrete examination elements and their weights will be published in the course 		
Responsible for this module: <ul style="list-style-type: none"> • Prof. Dr. rer. nat. Hans-Christian Jetter

CS2000-KP08, CS2000 - Theoretical Computer Science (TI)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

8

Course of study, specific field and term:

- Bachelor Media Informatics 2020 (compulsory), computer science, 3rd semester
- Bachelor Computer Science 2019 (compulsory), foundations of computer science, 3rd semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (compulsory), computer science, 3rd semester
- Bachelor Computer Science 2016 (compulsory), foundations of computer science, 3rd semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (compulsory), computer science, 3rd semester
- Bachelor MES 2011 (optional subject), computer science, 5th semester
- Bachelor Medical Informatics 2014 (compulsory), computer science, 3rd semester
- Bachelor Computer Science 2014 (compulsory), foundations of computer science, 3rd semester
- Bachelor Media Informatics 2014 (compulsory), computer science, 3rd semester
- Bachelor Medical Informatics 2011 (compulsory), computer science, 3rd semester
- Bachelor Computer Science 2012 (compulsory), foundations of computer science, 3rd semester

Classes and lectures:

- Theoretical Computer Science (lecture, 4 SWS)
- Theoretical Computer Science (exercise, 2 SWS)

Workload:

- 135 Hours private studies and exercises
- 90 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Formalization of problems using languages
- formal grammars
- regular languages, finite automata
- context free language, push down automata
- sequential computational models: Turing machines, register machines
- sequential complexity classes
- simulations, reductions, completeness
- satisfiability problem, NP-completeness
- (In-)decidability and enumerability
- halting problem and Church-Turing thesis

Qualification-goals/Competencies:

- Students are able to present the theoretical foundation of syntax and operational semantics of programming languages
- They are able to transform formalizations using theorems of theoretical computer science.
- They can classify problems according to their computational complexity
- They are able to model algorithmic problems and solve them using appropriate tools
- They can judge what computer science can and cannot achieve in principle

Grading through:

- written exam and course achievements

Is requisite for:

- Parallel Computing (CS3051-KP04, CS3051)

Requires:

- Algorithms and Data Structures (CS1001-KP08, CS1001)
- Introduction to Programming (CS1000-KP08, CS1000SJ14-MML/MI, CS1000SJ14-MIW)
- Introduction to Programming (CS1000-KP10, CS1000SJ14)

Responsible for this module:

Notes:

Admission requirements for taking the module:
- None (the competences of the modules indicated under

CS2500-KP04, CS2500 - Robotics (Robotik)		
Duration:	Turnus of offer:	Credit points:
1 Semester	each winter semester	4
Course of study, specific field and term:		
<ul style="list-style-type: none"> • Bachelor Robotics and Autonomous Systems 2020 (compulsory), Robotics and Autonomous Systems, 3rd semester • Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester • Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest • Bachelor Media Informatics 2020 (optional subject), Robotics and Autonomous Systems, 5th or 6th semester • Bachelor Medical Informatics 2019 (optional subject), medical computer science, 4th to 6th semester • Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester • Bachelor Robotics and Autonomous Systems 2016 (compulsory), Robotics and Autonomous Systems, 3rd semester • Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester • Bachelor MES 2014 (optional subject), computer science / electrical engineering, 5th semester • Bachelor Medical Informatics 2014 (optional subject), medical computer science, 5th or 6th semester • Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th semester • Bachelor Computer Science 2014 (compulsory), specialization field robotics and automation, 3rd semester • Bachelor Medical Informatics 2011 (optional subject), Applied computer science, 4th to 6th semester • Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th semester • Master CLS 2010 (optional subject), computer science, 3rd semester • Bachelor MES 2011 (optional subject), medical engineering science, 3rd or 5th semester • Bachelor Computer Science 2012 (compulsory), specialization field robotics and automation, 3rd semester 		
Classes and lectures:		Workload:
<ul style="list-style-type: none"> • Robotics (lecture, 2 SWS) • Robotics Exercise (exercise, 2 SWS) 		<ul style="list-style-type: none"> • 60 Hours in-classroom work • 60 Hours private studies
Contents of teaching:		
<ul style="list-style-type: none"> • Description of serial robotic systems: This part includes the basic components like different types of joints, sensors and actors. Exemplarily, the differing kinematic types are introduced. Also, the mathematical backgrounds are presented, necessary for the description of robots. The direct and inverse kinematics for typical 6-jointed industrial robots is explained. • Parallel robot systems: This part deals with the transfer of the results and mathematical models of part 1 onto robotic systems with parallel kinematics. • Movement: Robot movements along trajectories/geometric paths are analyzed. Different techniques of path planning are presented as well as methods to determine the configuration space and to perform velocity planning and kinematics. • Robot Control: Techniques of control theory and examples of programming techniques in robotics are introduced. Sensor and systems calibration as a typical application of robotics is explained in detail. 		
Qualification-goals/Competencies:		
<ul style="list-style-type: none"> • The students are able to solve application-oriented exercises with mathematical background self-dependent, timely and in team work. • They have gained basic understanding for the kinematic features of serial and simple parallel robots (includes knowledge of transformations, Euler-/Tail-Bryan-Angles, quaternions, etc.) • They made first experiences with the programming of simple robotic applications. • They comprehend the complexity and necessity for different path and dynamic planning techniques. • The students gained an insight into simple methods for system and sensor calibration. 		
Grading through:

MA2000-KP08, MA2000 - Analysis 1 (Ana1KP08)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

8

Course of study, specific field and term:

- Bachelor CLS 2023 (compulsory), mathematics, 1st semester
- Minor in Teaching Mathematics, Bachelor of Arts 2023 (compulsory), mathematics, 5th semester
- Bachelor Biophysics 2024 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor MES 2020 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Media Informatics 2020 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Computer Science 2019 (compulsory), mathematics, 1st semester
- Bachelor Robotics and Autonomous Systems 2020 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Medical Informatics 2019 (compulsory), mathematics, 1st semester
- Minor in Teaching Mathematics, Bachelor of Arts 2017 (compulsory), mathematics, 5th semester
- Bachelor Computer Science 2016 (compulsory), mathematics, 1st semester
- Bachelor CLS 2016 (compulsory), mathematics, 1st semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor IT-Security 2016 (compulsory), mathematics, 1st semester
- Bachelor Biophysics 2016 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Medical Informatics 2014 (compulsory), mathematics, 1st semester
- Bachelor Media Informatics 2014 (compulsory), mathematics, 1st semester
- Bachelor MES 2014 (compulsory: aptitude test), mathematics, 1st semester
- Bachelor Computer Science 2014 (compulsory), mathematics, 1st semester
- Bachelor Medical Informatics 2011 (compulsory), mathematics, 3rd semester
- Bachelor CLS 2010 (compulsory), mathematics, 1st semester
- Bachelor MES 2011 (compulsory), mathematics, 1st semester
- Bachelor Computer Science 2012 (compulsory), mathematics, 3rd semester

Classes and lectures:

- Analysis 1 (lecture, 4 SWS)
- Analysis 1 (exercise, 2 SWS)

Workload:

- 125 Hours private studies
- 90 Hours in-classroom work
- 25 Hours exam preparation

Contents of teaching:

- Sequences and series
- Functions and continuity
- Differentiability, Taylor series
- Metric and normalized spaces, basic topological concepts
- Multivariate differential calculus

Qualification-goals/Competencies:

- Students understand the basic terms of analysis, especially the concept of convergence.
- Students understand the basic thoughts and proof techniques and are able to use them for the analytical treatment of scientifically or technically motivated problems.
- Students can explain basic relationships in real analysis.
- Students can apply the basic concepts and proof techniques of differential calculus.
- Students have an understanding for abstract structures.
- Interdisciplinary qualifications:
- Students have a basic competence in modeling.
- Students can transfer theoretical concepts to similar applications.
- Students can work as a group on elementary mathematical problems.

Grading through:

- written exam

Is requisite for:

- Analysis 2 (MA2500-KP09)
- Analysis 2 (MA2500-KP08)

- Analysis 2 (MA2500-KP05, MA2500-MLS)
- Analysis 2 (MA2500-KP04, MA2500)

Responsible for this module:

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful completion of homework assignments during the semester
- Successful completion of e-tests

Modul exam:

- MA2000-L1: Analysis 1, written exam, 90 min, 100 % of module grade

MZ2100 A - Module Part: Course Anatomy (Anatomie)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

3

Course of study, specific field and term:

- Bachelor MES 2020 (Module part of a compulsory module), medicine, 1st semester
- Bachelor Medical Informatics 2019 (Module part of a compulsory module), medical computer science, 1st semester
- Bachelor MES 2014 (Module part of a compulsory module), medicine, 1st semester
- Bachelor Medical Informatics 2014 (Module part of a compulsory module), medical computer science, 1st semester
- Bachelor Medical Informatics 2011 (Module part of a compulsory module), medical computer science, 1st semester
- Bachelor MES 2011 (Module part of a compulsory module), medicine, 1st semester
- Bachelor Computer Science 2012 (Module part of a compulsory module), specialization field medical informatics, 3rd semester

Classes and lectures:

- Anatomy (lecture, 2 SWS)

Workload:

- 45 Hours private studies
- 30 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Cytology
- Microscopic anatomy
- Anatomical regions of the human body using medical terms, to describe anatomical position relationships and their principle functions
- Musculoskeletal system
- Respiratory tract, digestive system and cardiovascular system
- Kidney and urinary system
- Spinal cord, brain and peripheral nerves
- Blood, immune system and endocrine system

Qualification-goals/Competencies:

- Students know the cell organelles and can describe their principle functions.
- Students are able to describe the basic function of the main body tissues: epithelial tissue, connective tissue, muscle tissue and nervous tissues.
- Students are able to name the anatomical regions of the human body using medical terms, to describe anatomical position relationships and their principle functions.
- Students are able to link main bones with respective body regions.
- Students are able to describe the structures and the principal functions of individual organ systems.
- Students have the competency to use the main medical terms.

Grading through:

- written exam

CS2100 B - Module part: Embedded Systems (EmbedSa)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Computer Science 2012 (Module part of a compulsory module), foundations of computer science, 4th semester

Classes and lectures:

- Embedded Systems (exercise, 1 SWS)
- Embedded Systems (lecture, 2 SWS)

Workload:

- 60 Hours private studies
- 45 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Target architectures (microcontrollers, FPGAs etc.)
- Conceptual models
- Peripheral buses
- Scheduling algorithms
- Specification languages
- Transformation from specification to implementation
- Development tools

Qualification-goals/Competencies:

- Students are able to explain the differences between desktop systems and embedded systems.
- They are able to select an appropriate hardware architecture for an embedded system.
- They are able to select appropriate communication protocols for interfacing peripheral components.
- They are able to control peripheral components with a microcontroller.
- They are able to model embedded systems conceptually and to specify them formally.
- They are well acquainted with the model-based design and tool-based implementation and of simple embedded systems.

Grading through:

- written exam

Requires:

- Fundamentals of Computer Engineering (CS1200)

Responsible for this module:

- Siehe Hauptmodul

CS2700-KP04, CS2700 - Databases (DB)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Media Informatics 2020 (compulsory), computer science, 5th semester
- Bachelor Computer Science 2019 (compulsory), foundations of computer science, 3rd semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (compulsory), computer science, 3rd semester
- Bachelor Computer Science 2016 (compulsory), foundations of computer science, 4th semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (compulsory), computer science, 3rd semester
- Bachelor Biophysics 2016 (optional subject), computer science, 6th semester
- Bachelor MES 2011 (optional subject), computer science, 4th or 6th semester
- Bachelor Medical Informatics 2014 (compulsory), computer science, 4th semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 4th or 6th semester
- Bachelor Media Informatics 2014 (compulsory), foundations of computer science, 4th semester
- Bachelor Computer Science 2014 (compulsory), foundations of computer science, 4th semester
- Bachelor Medical Informatics 2011 (compulsory), computer science, 2nd semester
- Master CLS 2010 (optional subject), computer science, 2nd semester
- Bachelor CLS 2010 (optional subject), computer science, 6th semester
- Bachelor Computer Science 2012 (compulsory), foundations of computer science, 4th semester
- Bachelor Biophysics 2024 (optional subject), computer science, 6th semester

Classes and lectures:

- Databases (lecture, 2 SWS)
- Databases (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Introduction, conceptual view of database systems, conceptual data modeling with the Entity-Relationship (ER) modeling language
- The relational data model* Referential integrity, keys, foreign keys, functional dependencies (FDs)* Canonical mapping of entity types and relationships into the relational data model* Update, insertions, and deletion anomalies* Relational algebra as a query language* Database normalization, closure w.r.t. FD set, canonical cover of FD sets, normal forms, correct and dependency preserving decomposition of relation schemata, multi-value dependencies, inclusion dependencies
- Practical query language: SQL* Selection, projection, join, aggregation, grouping, sorting, difference, relational algebra in SQL* Data management* Integrity constraints
- Storage structures and database architecture* Characteristics of storage media, I/O complexity* DBMS architecture: disk space manager, buffer manager, files and access methods, record allocation strategies (row-wise, column-wise, mixed)
- Query processing* Indexing techniques, ISAM index, B+-tree index, hash index* Sorting: Two-way merge sort, blockwise processing, selection trees, query execution plans, join operator: nested loops join, blockwise nested loops join, index-based joins, sort-merge join, partition-based join with hashing* Addition operators: grouping and duplicate elimination, selection, projection, pipeline principle
- Datalog* Syntax, semantics, treatment of negation (stratification)* Evaluation strategies (naive, semi naive, magic set transformation)
- Query optimization* Cost metrics, Estimating sizes of intermediate tables, selectivity* Join optimization, physical plan properties, interesting orders, query transformation* Index cuts, bitmap indexes
- Transactions and recovery* ACID, anomalies, serializability, locks, 2-phase commit protocol, concurrent access to index structures, isolation levels* Implementation of transaction w.r.t. ACID, shadow pages, write ahead log, snapshots

Qualification-goals/Competencies:

- For all subjects mentioned in the course contents under the indents students should name the central ideas, which can define relevant terms and explain the functioning of algorithms by means of application examples.

Grading through:

- written exam

Is requisite for:

- Nonstandard Databases and Data Mining (CS3130-KP08)

- Nonstandard Database Systems (CS3202-KP04, CS3202)

Requires:

- Algorithms and Data Structures (CS1001-KP08, CS1001)
- Introduction to Programming (CS1000-KP08, CS1000SJ14-MML/MI, CS1000SJ14-MIW)
- Introduction to Programming (CS1000-KP10, CS1000SJ14)

Responsible for this module:

- [Prof. Dr. rer. nat. habil. Ralf Möller](#)

Teacher:

- [Institute of Information Systems](#)
- [Prof. Dr. rer. nat. habil. Ralf Möller](#)

Literature:

- A. Kemper, A. Eickler: Datenbanksysteme - Eine Einführung - Oldenbourg-Verlag

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None (the competences of the modules mentioned under "requires" are needed for this module, but are not a formal prerequisite).

Admission requirements for participation in module examination(s):

- Successful completion of exercise sheets as specified at the beginning of the semester.

Module Exam(s):

- CS2700-L1: Databases, written exam, 90min, 100% of the module grade.

CS3052-KP04, CS3052 - Programming Languages and Type Systems (ProgLan14)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2019 (optional subject), Canonical Specialization Web and Data Science, 3rd semester
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization SSE, 3rd semester
- Bachelor Media Informatics 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Media Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization SSE, 3rd semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester
- Bachelor Computer Science 2012 (compulsory), specialization field IT security and safety, 4th semester
- Master Computer Science 2012 (compulsory), advanced curriculum programming, 2nd or 3rd semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Bachelor CLS 2010 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th semester
- Bachelor Computer Science 2014 (compulsory), specialization field IT security and safety, 5th semester

Classes and lectures:

- Programming Languages and Type Systems (lecture, 2 SWS)
- Programming Languages and Type Systems (exercise, 1 SWS)

Workload:

- 60 Hours private studies and exercises
- 45 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Overview on programming languages
- Syntactic description of programming languages
- Language elements for data structures
- Type systems for programming languages
- Language elements for control structures
- Language elements for abstraction and modularization
- Typing and type systems
- Semantics of programming languages
- Language paradigms
- Language elements for concurrent programming
- Tools for programming languages

Qualification-goals/Competencies:

- The students can characterize major programming languages and can compare their application domains.
- They can understand, adapt and extend syntactic and semantic descriptions of programming languages.
- They can analyse the structure and principles of programming languages.
- They can learn on their own and classify new language elements.
- They can argue on the support of type systems for writing correct programs.
- They can evaluate possible programming languages for an application.

Grading through:

- Written or oral exam as announced by the examiner

Requires:

- Linear Algebra and Discrete Structures 1 (MA1000-KP08, MA1000)
- Algorithms and Data Structures (CS1001-KP08, CS1001)
- Introduction to Programming (CS1000-KP10, CS1000S14)

Notes:

Admission requirements for taking the module:
- None (the competencies of the modules listed under

CS3204-KP04, CS3204 - Artificial Intelligence 1 (KI1)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Robotics and Autonomous Systems 2020 (compulsory), Robotics and Autonomous Systems, 6th semester
- Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester
- Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Media Informatics 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (optional subject), computer science, 4th to 6th semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization Web and Data Science, 6th semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory), Robotics and Autonomous Systems, 6th semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Bachelor Biophysics 2016 (optional subject), computer science, 6th semester
- Bachelor Medical Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Media Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 6th semester
- Bachelor Computer Science 2014 (compulsory), specialization field robotics and automation, 6th semester
- Bachelor Medical Informatics 2011 (optional subject), Applied computer science, 4th to 6th semester
- Bachelor CLS 2010 (optional subject), computer science, 6th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 6th semester
- Bachelor Computer Science 2012 (compulsory), specialization field robotics and automation, 4th semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester
- Bachelor Biophysics 2024 (optional subject), computer science, 6th semester

Classes and lectures:

- Artificial Intelligence (lecture, 2 SWS)
- Artificial Intelligence (exercise, 2 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Part 1: Search strategies As an introduction and a prerequisite for most of the principles of artificial intelligence search strategies are introduced and explained. We will introduce uninformed, informed, local search, adversarial search as well as heuristic search. The concept of agents will be presented.
- Part 2: Learning and reasoning Revision of the foundations of mathematical logic and probability. Principles of machine learning (supervised and unsupervised) are introduced. An introduction to fuzzy logic is also included.
- Part 3: Applications of artificial intelligence Typical applications in the fields of robotics, machine vision, and industrial image and data processing are identified. Ethical issues and risks of the development of artificial intelligence are discussed.

Qualification-goals/Competencies:

- The students are able to handle scope-oriented tutorials with a mathematical background in a team, and timely.
- They have developed an understanding for the benefits and disadvantages of the different search and problem solving techniques.
- The students are in a position to choose and apply independently appropriate algorithms for search and learning issues.
- They have gained an insight into the complex development of systems with artificial intelligence and the distinction of its various forms.
- The students have an understanding of the risks and possible technological consequences of the development of systems with strong AI.

Grading through:

- written exam

Requires:

- Analysis 2 (MA2500-KP04, MA2500)
- Algorithms and Data Structures (CS1001-KP08, CS1001)

Language:

- offered only in German

Notes:

Admission requirements for taking the module

- None (the competences of the modules mentioned under **Requires** are needed for this module, but are not a formal prerequisite).

Admission requirements for participation in module examination(s):

- Successful completion of exercises as specified at the beginning of the semester.

Module Exam(s):

- CS3204-L1: Artificial Intelligence, written exam, 90min, 100% of the module grade

CS3300 - Informatics in Health Care - eHealth (eHealth)
Duration:

1 Semester

Turnus of offer:

not available anymore

Credit points:

5

Course of study, specific field and term:

- Bachelor Computer Science 2012 (compulsory), specialization field medical informatics, 4th semester

Classes and lectures:

- Informatics in Health Care - eHealth (lecture, 2 SWS)
- Informatics in Health Care - eHealth (exercise, 2 SWS)

Workload:

- 70 Hours private studies
- 60 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Health Care System: organization, legislation and funding
- Distributed patient care and patient records
- Medical Documentation and Communication
- Coding of diagnoses and procedures
- Hospital Information Systems
- DRG-based compensation system and accounting of cases
- Telematics in medicine: electronic health insurance card

Qualification-goals/Competencies:

- Insight into the methods and procedures of subfields of medical informatics
- Ability to independent processing of selected tasks with specialized tools
- Ability to assess the upcoming IT challenges in view of the current political and economical developments in the health care system

Grading through:

- Written or oral exam as announced by the examiner

Responsible for this module:

- [Prof. Dr. rer. nat. habil. Heinz Handels](#)

Teacher:

- [Institute of Medical Informatics](#)
- [Prof. Dr. rer. nat. habil. Josef Ingenerf](#)

LS2500-KP04, LS2500 - Biology (Bio)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Computer Science 2019 (optional subject), Extended optional subjects, Arbitrary semester
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization Bioinformatics and Systems Biology, 2nd semester
- Bachelor Medical Informatics 2019 (optional subject), medical computer science, 4th to 6th semester
- Bachelor Computer Science 2016 (optional subject), advanced curriculum, Arbitrary semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization Bioinformatics, 2nd semester
- Bachelor Computer Science 2014 (compulsory), specialization field bioinformatics, 2nd semester
- Bachelor MES 2011 (optional subject), medical engineering science (expiring), 4th semester
- Bachelor Computer Science 2012 (compulsory), specialization field bioinformatics, 4th semester

Classes and lectures:

- Biology for computer scientists (lecture, 2 SWS)
- Biology for computer scientists (exercise, 1 SWS)

Workload:

- 75 Hours private studies
- 45 Hours in-classroom work

Contents of teaching:

- Structure and function of biological macromolecules
- structure of cells
- cytoskeleton
- chromosomes
- epigenetics
- replication
- transcription
- translation
- cell cycle
- mitosis
- formal genetics
- mutation and inherited disease
- multifactorial hereditary diseases
- viruses

Qualification-goals/Competencies:

- Students can explain and compare the construction principles of procaryotic and eukariotic cells.
- They can explain the function of cellular compartments of the cytoskeleton of eukariotic cells and deduce the evolutionary advantages.
- They can denote the molecular mechanisms of replication, transcription and translation and make the connections to cell physiology.
- The basic understanding of the cell cycle and formal genetics enables the students to comprehend the emergence of hereditary diseases and to explain concrete diseases.
- With their knowledge of basic biological relations the student can analyse biological data with algorithmic methods.

Grading through:

- written exam

Is requisite for:

- Molecular Genetics (LS3100-KP04, LS3100SJ14)

Responsible for this module:

- Prof. Dr. rer. nat. Enno Hartmann

Teacher:

- [Institute for Biology](#)
- Prof. Dr. rer. nat. Enno Hartmann
- [PD Dr. rer. nat. Bärbel Kunze](#)
- [Prof. Dr. rer. nat. Rainer Duden](#)
- Dr. rer. nat. Nicole Sommer

**Literature:**

- Campbell & Reece: Biologie - Pearson
- Purves, Sadava, Orians, Heller: Biologie - Spektrum
- Markl: - Klett

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- For the preparation of the practical exercise, it is urgently required that participants register in the corresponding Moodle course by the beginning of the semester on 1 April.

Admission requirements for participation in module examination(s):

- Regular participation in the exercises as specified at the beginning of the semester.

Module Exam(s):

- LS2500-L1: Fundamentals of Biology, written exam, 60min, 100% of module grade.

Passing this module is a prerequisite for participation in the module LS3100-KP04 Molecular Genetics.

MA2500-KP04, MA2500 - Analysis 2 (Ana2KP04)		
Duration:	Turnus of offer:	Credit points:

Admission requirements for the examination:

- Successful completion of exercises during the semester as specified at the beginning of the semester.
- Successful completion of e-tests as specified at the beginning of the semester.

Module Exam(s):

- MA2500-L1: Analysis 2, written exam, 90min, 100% of the module grade

MA2510-KP04, MA2510 - Stochastics 1 (Stoch1)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Minor in Teaching Mathematics, Bachelor of Arts 2023 (compulsory), mathematics, 8th semester
- Bachelor CLS 2023 (compulsory), mathematics, 2nd semester
- Bachelor MES 2020 (optional subject), mathematics / natural sciences, 3rd semester at the earliest
- Bachelor Biophysics 2024 (optional subject), mathematics, 6th semester
- Bachelor Computer Science 2019 (compulsory), mathematics, 4th semester
- Bachelor Robotics and Autonomous Systems 2020 (compulsory), mathematics, 4th semester
- Bachelor Medical Informatics 2019 (optional subject), mathematics, 4th to 6th semester
- Minor in Teaching Mathematics, Bachelor of Arts 2017 (compulsory), mathematics, 8th semester
- Bachelor Computer Science 2016 (compulsory), mathematics, 4th semester
- Bachelor CLS 2016 (compulsory), mathematics, 2nd semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory), mathematics, 4th semester
- Bachelor IT-Security 2016 (compulsory), mathematics, 2nd semester
- Bachelor Biophysics 2016 (optional subject), mathematics, 6th semester
- Bachelor Medical Informatics 2014 (optional subject), mathematics, 5th or 6th semester
- Bachelor MES 2014 (optional subject), mathematics / natural sciences, 4th or 6th semester
- Bachelor Computer Science 2014 (compulsory), mathematics, 4th semester
- Bachelor Computer Science 2012 (compulsory), mathematics, 4th semester
- Bachelor MES 2011 (compulsory), mathematics, 4th semester
- Bachelor CLS 2010 (compulsory), mathematics, 2nd semester

Classes and lectures:

- Stochastics 1 (lecture, 2 SWS)
- Stochastic 1 (exercise, 1 SWS)

Workload:

- 65 Hours private studies and exercises
- 45 Hours in-classroom work
- 10 Hours exam preparation

Contents of teaching:

- probability spaces
- basics of combinatorics
- conditional probability and stochastic independency
- random variables
- important discrete and continuous one-dimensional probability distributions
- characteristics of distributions
- law of large numbers, central limit theorem
- modeling examples from the life sciences

Qualification-goals/Competencies:

- Students are able to explain basic stochastic models formally correct and in the context of their application
- They are able to formalize stochastic problems
- They are able to identify basic combinatorial patterns and to use them for solving stochastic problems
- They understand central statements of elementary stochastics

Grading through:

- written exam

Is requisite for:

- Stochastic processes (MA4610-KP05)
- Stochastic processes and modeling (MA4610-KP04, MA4610)
- Modeling Biological Systems (MA4450-KP08, MA4450-MML)
- Modeling Biological Systems (MA4450-KP07)
- Module part: Modeling Biological Systems (MA4450 T-INF)
- Module part: Modeling Biological Systems (MA4450 T)
- Modeling Biological Systems (MA4450)
- Modeling (MA4449-KP07)

- Module part: Stochastics 2 (MA4020 T)
- Stochastics 2 (MA4020-KP05)
- Stochastics 2 (MA4020-MML)
- Stochastics 2 (MA4020-KP04, MA4020)

Responsible for this module:

- [Nachfolge von Prof. Dr. rer. nat. Karsten Keller](#)

Teacher:

- [Institute for Mathematics](#)
- [Nachfolge von Prof. Dr. rer. nat. Karsten Keller](#)

Literature:

- N. Henze: Stochastik für Einsteiger - Vieweg
- U. Krengel: Einführung in die Wahrscheinlichkeitstheorie - Vieweg

Language:

- offered only in German

Notes:

Admission requirements for taking the module:
- None

Admission requirements for participation in module examination(s):
- Successful completion of homework assignments during the semester

Module exam(s):
- MA2510-L1: Stochastics 1, written exam, 90 min, 100 % of module grade

CS3051-KP04, CS3051 - Parallel Computing (ParallelVa)

Duration:

1 Semester

Turnus of offer:

normally each year in the summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2019 (optional subject), Canonical Specialization SSE, 4th semester
- Bachelor Media Informatics 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2016 (optional subject), Canonical Specialization Web and Data Science, 4th semester
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2016 (optional subject), Canonical Specialization SSE, 4th semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Master Medical Informatics 2014 (optional subject), computer science, 1st or 2nd semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th or 6th semester
- Master Computer Science 2012 (optional subject), advanced curriculum programming, 2nd and 3rd semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester
- Master Computer Science 2012 (optional subject), advanced curriculum algorithmics and complexity theory, 2nd or 3rd semester

Classes and lectures:

- Parallel Computing (lecture, 2 SWS)
- Parallel Computing (exercise, 1 SWS)

Workload:

- 65 Hours private studies and exercises
- 45 Hours in-classroom work
- 10 Hours exam preparation

Contents of teaching:

- Parallel architectures
- Programming language support for parallel programming
- Design methodologies for parallel algorithms
- Implementation of parallel algorithms
- Parallel search and sorting
- Parallel graph algorithms
- Parallel formula evaluation
- Speedup, efficiency, parallel complexity classes
- Limits of parallelism and lower bounds

Qualification-goals/Competencies:

- Studentes are able to describe the design and function of parallel systems.
- They are able to design and implement parallel algorithms.
- They are able to analyze parallel systems and programs.
- They are able to describe the limits of parallel systems.

Grading through:

- Viva Voce or test

Requires:

- Theoretical Computer Science (CS2000-KP08, CS2000)

Responsible for this module:

- [Prof. Dr. rer. nat. Till Tantau](#)

Teacher:

- [Institute for Theoretical Computer Science](#)
- [Prof. Dr. rer. nat. Till Tantau](#)

Literature:

- Jaja: An Introduction to Parallel Algorithms - Addison Wesley, 1992

- Quinn: Parallel Programming in C with MPI and OpenMP - McGraw Hill, 2004

Language:

- offered only in German

Notes:

Admission requirements for taking the module:
- None (the competencies of the modules listed under

CS3110-KP04, CS3110 - Computer-Aided Design of Digital Circuits (SchaltEntw)
Duration:

1 Semester

Turnus of offer:

irregularly in the winter semester

Credit points:

4

Course of study, specific field and term:

- Master MES 2020 (optional subject), computer science / electrical engineering, Arbitrary semester
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 5th or 6th semester
- Master Robotics and Autonomous Systems 2019 (optional subject), Additionally recognized elective module, Arbitrary semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th or 6th semester
- Bachelor MES 2011 (optional subject), Applied computer science, 3rd, 5th, or 6th semester
- Bachelor CLS 2010 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester

Classes and lectures:

- Computer-Aided Design of Digital Circuits (lecture, 2 SWS)
- Computer-Aided Design of Digital Circuits (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Abstraction levels in circuit design
- Design cycle and design strategies
- FPGA architectures
- Introduction of the hardware description language VHDL
- Design of standard components in VHDL
- Circuit design at different abstraction levels
- Circuit design for synthesis
- VHDL simulation cycle
- VHDL circuit design for FPGAs
- Designing Testbenches
- High-Level-Synthesis

Qualification-goals/Competencies:

- Based on a non-formal description of a digital system, students are able to design digital circuits using VHDL
- They are able to simulate and test VHDL descriptions
- They are able to explain the internal structures of FPGAs
- They are able to determine which VHDL construct will result in which circuit structure
- They are able to explain the VHDL simulation cycle
- They are able to write synthesizable VHDL code

Grading through:

- written exam

Requires:

- Fundamentals of Computer Engineering 2 (CS1202-KP06, CS1202)

Responsible for this module:

- [Prof. Dr.-Ing. Mladen Berekovic](#)

Teacher:

- [Institute of Computer Engineering](#)
- [Prof. Dr.-Ing. Mladen Berekovic](#)

Literature:

- F. Kesel, R. Bartholomä: Entwurf von digitalen Schaltungen und Systemen mit HDLs und FPGAs - Oldenbour Verlag 2009

- C.Maxfield: The Design Warrior's Guide to FPGAs - Newnes 2004

Language:

- offered only in German

Notes:

Admission requirements for taking the module:
- None (the competencies of the modules listed under

CS3120 - Electronics and Microsystems (EIMi)
Duration:

1 Semester

Turnus of offer:

not available anymore

Credit points:

4

Course of study, specific field and term:

- Master MES 2011 (optional subject), mathematics, 1st semester
- Master MES 2011 (advanced curriculum), imaging systems, signal and image processing, 1st semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 3rd or 5th semester
- Bachelor Computer Science 2012 (compulsory), specialization field robotics and automation, 5th semester

Classes and lectures:

- Electronics and Microsystems (lecture, 2 SWS)
- Electronics and Microsystems (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Analysis of DC-networks
- Transient analysis in the time-domain
- Network analysis in the frequency domain
- Passive filters
- Oscillator circuits
- Diodes
- Bipolar and field-effect transistors
- Amplifiers
- Operational amplifiers
- Active filters
- Sensors
- Digital-analog converters
- Analog-digital converters
- Introduction to Microsystems engineering

Qualification-goals/Competencies:

- Students know the most important electronic components and corresponding basic circuits.
- They are qualified to design and analyse basic active and passive electronic circuits.
- They have basic knowledge about the methods of microsystems engineering and its application areas.

Grading through:

- e-tests

Requires:

- Fundamentals of Computer Engineering (CS1200)

Responsible for this module:

- [Prof. Dr.-Ing. Mladen Berekovic](#)

Teacher:

- [Institute of Computer Engineering](#)
- [Prof. Dr.-Ing. Mladen Berekovic](#)

- Menz, W.; Mohr, J.; Paul, O.: Mikrosystemtechnik für Ingenieure - New York: Wiley 2005

Language:

- offered only in German

Notes:

Prerequisites for attending the module:

- None

CS3202-KP04, CS3202 - Nonstandard Database Systems (NDB)
Duration:

1 Semester

Turnus of offer:

not available anymore

Credit points:

4

Course of study, specific field and term:

- Bachelor Medical Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Media Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th or 6th semester
- Bachelor Medical Informatics 2011 (optional subject), Applied computer science, 4th to 6th semester
- Master Computer Science 2012 (optional subject), specialization field media informatics, 2nd or 3rd semester
- Master CLS 2010 (optional subject), computer science, Arbitrary semester
- Bachelor CLS 2010 (optional subject), computer science, 6th semester
- Master Computer Science 2012 (optional subject), advanced curriculum distributed information systems, 2nd or 3rd semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester

Classes and lectures:

- Nonstandard Database Systems (lecture, 2 SWS)
- Nonstandard Database Systems (exercise, 1 SWS)

Workload:

- 65 Hours private studies
- 45 Hours in-classroom work
- 10 Hours exam preparation

Contents of teaching:

- introduction
- semistructured databases
- Temporal and spatial databases (temporally restricted validity, multidimensional index structures)
- Sequence Databases
- Databases for data streams (window concept)
- Databases for incomplete information (e.g., constraint databases)
- Probabilistic databases
- Databases with answer ranking (top-k queries)

Qualification-goals/Competencies:

- Knowledge: Students can name the main features of standard databases and, in addition, can explain which non-standard database models emerge if features are dropped. They can describe the main ideas behind non-standard databases presented in the course by explaining the main features of respective query languages (syntax and semantics) as well as the most important implementation techniques used for their practical realization.
- Skills: Students can apply query languages for non-standard data models introduced in the course to retrieve desired structures from sample datasets in order to satisfy information needs specified textually in natural language. Students are able to represent data in the relational data model using encoding techniques presented in the course such that they can demonstrate how new formalisms relate to or can be implemented in SQL (in particular, SQL-99). In case an SQL transformation cannot be found, students can explain and apply dedicated algorithms for query answering. Students can demonstrate how index structures help answering queries fast by showing how index structures are built, updated, and exploited for query answering. The participants of the course can derive query answers by evaluating queries step by step and by deriving optimized query execution plans.
- Social skills: Students work in teams to handle assignments, and they are encouraged to present their solution to other students in small presentations (in lab classes). In addition, self-dependence is fostered by giving pointers to query evaluation engines for various formalism presented in the lecture such that students get familiar with data models and query languages by self-controlled work.

Grading through:

- Written or oral exam as announced by the examiner

Requires:

- Databases (CS2700-KP04, CS2700)

Responsible for this module:

CS3205-KP04, CS3205 - Computer Graphics (CompGrafik)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester
- Bachelor MES 2020 (optional subject), computer science / electrical engineering, 3rd semester at the earliest
- Bachelor Media Informatics 2020 (compulsory), media informatics, 6th semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (optional subject), computer science, 4th to 6th semester
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Bachelor Medical Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor MES 2014 (optional subject), computer science / electrical engineering, 4th or 6th semester
- Bachelor Media Informatics 2014 (compulsory), media informatics, 6th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th or 6th semester
- Bachelor Medical Informatics 2011 (optional subject), computer science, 4th to 6th semester
- Master Computer Science 2012 (optional subject), advanced curriculum imaging systems, 2nd or 3rd semester
- Bachelor CLS 2010 (optional subject), mathematics, 6th semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 5th or 6th semester
- Master CLS 2010 (optional subject), mathematics, 2nd semester
- Bachelor Computer Science 2012 (compulsory), specialization field media informatics, 5th or 6th semester

Classes and lectures:

- Computer Graphics (lecture, 2 SWS)
- Computer Graphics (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Geometric transformations in 2D and 3D
- Homogeneous coordinates
- Transformations between Cartesian coordinate systems
- Planar and perspective projections
- Polygonal models
- Illumination models and shading methods
- Texture Mapping
- Culling and clipping
- Hidden line and surface removal
- Raster graphics algorithms
- Ray tracing
- Shadows, reflections and transparency
- Basics of graphics programming with OpenGL and GLSL

Qualification-goals/Competencies:

- Students know the basic concepts, algorithms and methods in computer graphics
- They are able to implement and apply principle algorithms
- They are able to explain the learned techniques and to assess their possibilities and limitations

Grading through:

- written exam

Requires:

- Linear Algebra and Discrete Structures 2 (MA1500-KP08, MA1500)
- Linear Algebra and Discrete Structures 1 (MA1000-KP08, MA1000)

Responsible for this module:

- Prof. Dr. rer. nat. habil. Heinz Handels

Teacher:

- Institute of Medical Informatics
- Dr. rer. nat. Jan Ehrhardt

Literature:

- Foley et. al: Grundlagen der Computergrafik - Addison-Wesley, 1994

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None (the competences of the modules listed under "requires" are needed for this module, but are not a formal prerequisite)

Admission requirements for participation in module examination(s):

- Successful completion of exercise slips and programming projects as specified at the beginning of the semester

Module exam(s):

- CS3205-L1: Computer Graphics, written exam, 90 min, 100 % of module grade

MA3110-KP04, MA3110 - Numerics 1 (Num1KP04)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Master Auditory Technology 2022 (optional subject), Elective, Arbitrary semester
- Bachelor Computer Science 2019 (optional subject), Extended optional subjects, Arbitrary semester
- Bachelor MES 2020 (optional subject), mathematics / natural sciences, 3rd semester at the earliest
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), mathematics, 5th or 6th semester
- Bachelor Medical Informatics 2019 (optional subject), mathematics, 4th to 6th semester
- Bachelor IT-Security 2016 (optional subject), mathematics, Arbitrary semester
- Master Auditory Technology 2017 (optional subject), compulsory module depending on previous knowledge , 1st semester
- Bachelor Computer Science 2016 (optional subject), advanced curriculum, Arbitrary semester
- Bachelor Computer Science 2016 (optional subject), Canonical Specialization Web and Data Science, 3rd semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), mathematics, 5th or 6th semester
- Bachelor Medical Informatics 2014 (optional subject), mathematics, 5th or 6th semester
- Bachelor MES 2014 (optional subject), mathematics / natural sciences, 3rd or 5th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th semester
- Master MES 2011 (optional subject), mathematics, 1st semester
- Bachelor MES 2011 (optional subject), mathematics, 3rd semester
- Bachelor Computer Science 2012 (optional subject), mathematics, 5th or 6th semester

Classes and lectures:

- Numerics 1 (lecture, 2 SWS)
- Numerics 1 (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Round-off errors and condition
- Direct solvers for linear equations
- LR decomposition
- Perturbation theory
- Cholesky decomposition
- QR decomposition, least squares fit

Qualification-goals/Competencies:

- Students understand basic numerical tasks.
- They are proficient in the modern programming language MATLAB.
- They can implement theoretical algorithms.
- They can assess the quality of a method (accuracy, stability, complexity).

Grading through:

- written exam

Requires:

- Linear Algebra and Discrete Structures 2 (MA1500-KP08, MA1500)
- Linear Algebra and Discrete Structures 1 (MA1000-KP08, MA1000)
- Analysis 2 (MA2500-KP04, MA2500)
- Analysis 1 (MA2000-KP08, MA2000)

Responsible for this module:

- [Prof. Dr. rer. nat. Andreas Rößler](#)

Teacher:

- [Institute for Mathematics](#)
- [Prof. Dr. rer. nat. Andreas Rößler](#)

Literature:

- M. Bollhöfer, V. Mehrmann: Numerische Mathematik - Vieweg (2004)

- A. M. Quarteroni, R. Sacco, F. Saleri: Numerical Mathematics - 2. Auflage, Springer (2006)

Language:

- offered only in German

Notes:

The lecture is identical to that in module MA3110-MML/Numerics 1.

Prerequisites for attending the module:

- None (The competences of the required modules are required for this module, but the modules are not a prerequisite for admission).

Prerequisites for the exam:

- Preliminary examinations can be determined at the beginning of the semester. If preliminary work has been defined, it must have been completed and positively assessed before the initial examination.

MA3445-KP04, MA3445 - Graph Theory (Graphen)
Duration:

1 Semester

Turnus of offer:

every second year

Credit points:

4

Course of study, specific field and term:

- Master MES 2020 (optional subject), mathematics / natural sciences, Arbitrary semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), mathematics, 5th or 6th semester
- Bachelor Medical Informatics 2019 (optional subject), mathematics, 4th to 6th semester
- Bachelor IT-Security 2016 (optional subject), mathematics, Arbitrary semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), mathematics, 5th or 6th semester
- Bachelor Medical Informatics 2014 (optional subject), mathematics, 5th or 6th semester
- Master MES 2014 (optional subject), mathematics / natural sciences, 1st or 2nd semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th or 6th semester
- Master CLS 2010 (optional subject), mathematics, Arbitrary semester
- Master MES 2011 (optional subject), mathematics, 1st or 2nd semester
- Bachelor CLS 2010 (optional subject), mathematics, 5th or 6th semester
- Bachelor Computer Science 2012 (optional subject), mathematics, 5th or 6th semester

Classes and lectures:

- Graph theory (lecture, 2 SWS)
- Graph theory (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Hamiltonian graphs and degree sequences
- Menger's theorem - new proofs
- Matchings and decompositions of graphs
- The theorems of Turan and Ramsey
- Vertex and edge colourings
- The four colour theorem

Qualification-goals/Competencies:

- Ability to solve discrete problems using graph theoretical methods
- Knowledge of proof techniques and ideas of discrete mathematics
- Knowledge of fundamental and selected recent research results

Grading through:

- Oral examination

Requires:

- Linear Algebra and Discrete Structures 2 (MA1500-KP08, MA1500)
- Linear Algebra and Discrete Structures 1 (MA1000-KP08, MA1000)

Responsible for this module:

- [PD Dr. rer. nat. Christian Bey](#)

Teacher:

- [Institute for Mathematics](#)

- B. Bollobas: Modern Graph Theory - Berlin: Springer 1998

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None (the competencies of the modules listed under "Requires" are required for this module, but are not a formal prerequisite).

Admission requirements for taking module examination(s):

- Successful completion of exercises as specified at the beginning of the semester.

Module Exam(s):

- MA3445-L1: Graph Theory, oral exam, 30 min, 100% of module grade.

CS3000-KP04, CS3000 - Algorithm Design (AlgoDesign)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Master CLS 2023 (optional subject), computer science, 3rd semester
- Bachelor Computer Science 2019 (compulsory), foundations of computer science, 5th semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Medical Informatics 2019 (optional subject), computer science, 4th to 6th semester
- Bachelor Computer Science 2016 (compulsory), foundations of computer science, 5th semester
- Master CLS 2016 (optional subject), computer science, 3rd semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (compulsory), computer science, 5th semester
- Bachelor Medical Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2014 (compulsory), foundations of computer science, 5th semester
- Bachelor CLS 2010 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2012 (compulsory), foundations of computer science, 5th semester

Classes and lectures:

- Algorithm Design (lecture, 2 SWS)
- Algorithm Design (exercise, 1 SWS)

Workload:

- 65 Hours private studies and exercises
- 45 Hours in-classroom work
- 10 Hours exam preparation

Contents of teaching:

- Dynamic programming and heuristic search methods
- Complex data structures and union find data structures
- Efficiency analysis and correctness proofs
- Probabilistic algorithms
- Online algorithms
- Graph, matching and scheduling problems
- String processing
- Approximation algorithms

Qualification-goals/Competencies:

- The students can safely apply the principles of algorithm design.
- They can analyze algorithms with respect to correctness and efficiency.
- They are able to apply these principles to concrete problems.
- They can contribute their proficiency in solving similar algorithmic problems.

Grading through:

- written exam

Requires:

- Stochastics 1 (MA2510-KP04, MA2510)
- Theoretical Computer Science (CS2000-KP08, CS2000)
- Algorithms and Data Structures (CS1001-KP08, CS1001)

Responsible for this module:

- [Prof. Dr. Rüdiger Reischuk](#)

Teacher:

- [Institute for Theoretical Computer Science](#)
- [Prof. Dr. Rüdiger Reischuk](#)
- [Prof. Dr. rer. nat. Till Tantau](#)

Literature:

- J. Kleinberg, E. Tardos: Algorithm Design - Addison Wesley, 2005

- T. Cormen, C. Leiserson, R. Rivest, C. Stein: Introduction to Algorithms - MIT Press, 2009

Language:

- offered only in German

Notes:

Prerequisites for attending the module:

- None (The competencies of the modules listed under 'Requires' are needed for this module, but are not a formal prerequisite)

Prerequisites for the exam:

- Successful completion of homework and project assignments as specified at the beginning of the semester.

Module exam(s):

- CS3000-L1: Algorithm Design, written exam, 90 min, 100 % of module grade

CS3100-KP04 - Signal processing (SignalV)		
Duration: 1 Semester	Turnus of offer: each winter semester	Credit points: 4
Course of study, specific field and term: <ul style="list-style-type: none"> • Bachelor Robotics and Autonomous Systems 2016 (compulsory), computer science, 5th semester • Bachelor Medical Informatics 2011 (compulsory), computer science, 5th semester • Master CLS 2010 (compulsory), mathematics, 1st semester • Bachelor Computer Science 2012 (compulsory), foundations of computer science, 5th semester 		
Classes and lectures: <ul style="list-style-type: none"> • Signal processing (lecture, 2 SWS) • Signal processing (exercise, 1 SWS) 	Workload: <ul style="list-style-type: none"> • 55 Hours private studies • 45 Hours in-classroom work • 20 Hours exam preparation 	
Contents of teaching: <ul style="list-style-type: none"> • Linear time-invariant systems • Impulse response • Convolution • Fourier transform • Transfer function • Correlation and energy density of deterministic signals • Sampling • Discrete-time signals and systems • Discrete-time Fourier transform • z-Transform • FIR and IIR filters • Block diagrams • FIR filter design • Discrete Fourier transform (DFT) • Fast Fourier transform (FFT) • Characterization and processing of random signals 		
Qualification-goals/Competencies: <ul style="list-style-type: none"> • Students are able to explain the fundamentals of linear system theory. • They are able to describe the basic elements of signal processing. • They will have a command of methods for the description and analysis of continuous-time and discrete-time signals and systems. • They are able to design digital filters and know various structures for their implementation. • They are able to explain the basic techniques for describing and processing of random signals. 		
Grading through: <ul style="list-style-type: none"> • Written or oral exam as announced by the examiner 		
Is requisite for: <ul style="list-style-type: none"> • Image processing (CS3203) 		
Responsible for this module: <ul style="list-style-type: none"> • Prof. Dr.-Ing. Alfred Mertins 		
Teacher: <ul style="list-style-type: none"> • Institute for Signal Processing • Prof. Dr.-Ing. Alfred Mertins 		
Literature: <ul style="list-style-type: none"> • A. Mertins: Signaltheorie: Grundlagen der Signalbeschreibung, Filterbänke, Wavelets, Zeit-Frequenz-Analyse, Parameter- und Signalschätzung - Springer-Vieweg, 3. Auflage, 2013 		

Language:

- offered only in German

Notes:

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Successful completion of homework assignments during the semester (at least 50% of the max. points).

Modul exam:

- CS3100-L1: Signal Processing, written exam, 120 Min., 100% of modul grade

CS3200 - Software Engineering II (SWEng)		
Duration: 1 Semester	Turnus of offer: not available anymore	Credit points: 4
Course of study, specific field and term: <ul style="list-style-type: none"> • Bachelor Medical Informatics 2011 (optional subject), software engineering, 4th to 6th semester • Bachelor CLS 2010 (optional subject), computer science, 5th or 6th semester • Bachelor MES 2011 (compulsory), foundations of computer science, 5th semester • Bachelor Computer Science 2012 (compulsory), foundations of computer science, 5th semester

CS3310-INF - Image and Signal Processing in Medicine 1 (MBS)
Duration:

1 Semester

Turnus of offer:

not available anymore

Credit points:

5

Course of study, specific field and term:

- Bachelor Computer Science 2012 (compulsory), specialization field medical informatics, 5th semester

Classes and lectures:

- Image and signal processing in medicine 1 (lecture, 2 SWS)
- Image and signal processing in medicine 1 (exercise, 2 SWS)

Workload:

- 70 Hours private studies
- 60 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Motivation, principles and applications of medical image and signal processing
- Signal processing in electrocardiography (ECG)
- Signal processing in the electroencephalogram (EEG)
- Structure and formats of medical images
- Fundamentals of pattern recognition (segmentation, feature extraction, classification, interpretation)
- Histograms and image transformations
- Image filtering with local operators
- Segmentation: thresholding, region growing
- Morphological operators
- Application and evaluation of segmentation methods
- Basic methods for the visualization of medical images and image sequences
- Basic methods of image registration: rigid image registration
- Combined signal and image analysis in functional MRI
- Application examples

Qualification-goals/Competencies:

- Basic knowledge of methods and procedures of medical image processing
- Ability to evaluate and apply the application methods and algorithms in the respective phase of image processing pipelines
- Overview of the scope of medical image processing by many examples
- Capacity for communication and processing of medical image data
- Knowledge of methods for combined analysis of signal and image sequences in medicine

Grading through:

- written exam

Responsible for this module:

Teacher: <ul style="list-style-type: none"> • Institute for Theoretical Computer Science • Prof. Dr. rer. nat. habil. Ralf Möller • Prof. Dr. Stefan Fischer • Prof. Dr. Martin Leucker • Prof. Dr. Rüdiger Reischuk • Prof. Dr. Maciej Liskiewicz 			
Literature: <ul style="list-style-type: none"> • : topic specific literature will be provided • : 			
Language: <ul style="list-style-type: none"> • German and English skills required 			
Notes:			

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

Presentation of a lecture on the given topic

- Written elaboration of the lecture according to the requirements at the beginning of the semester

- Participation in all seminar dates

Module Exam(s):

- CS3400-L1, seminar data security, presentation, ungraded

Students have to register and select their topic at a preparing meeting the previous semester

CS3501-KP04, CS3501 - Lab Course Robotics and Automation (PraktRob)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4 (Typ B)

Course of study, specific field and term:

- Bachelor Robotics and Autonomous Systems 2020 (compulsory), Robotics and Autonomous Systems, 5th semester
- Bachelor Robotics and Autonomous Systems 2016 (compulsory), Robotics and Autonomous Systems, 5th semester
- Bachelor Computer Science 2014 (compulsory), specialization field robotics and automation, 5th semester
- Bachelor Computer Science 2012 (compulsory), specialization field robotics and automation, 5th semester

Classes and lectures:

- Lab Class Robotics and Automation (practical course, 3 SWS)

Workload:

- 45 Hours group work
- 45 Hours in-classroom work
- 30 Hours private studies

Contents of teaching:

- Combination of robotics and navigation
- Introduction to project management
- Realization of different robotic tasks in virtual and real environment
- Kinematics (direct and inverse)
- Implementation in the environments using sensor technology
- Human-Robot-Interaction

Qualification-goals/Competencies:

- The students can realize different concepts of robot and navigation system control and of mobile robots in real life systems.
- They are able to implement the combination of robotics and navigation for simple tasks.
- The students are in a position to do the project planning and realize it in teamwork according to predefined milestones.

Grading through:

- programming project

Requires:

- Robotics (CS2500-KP04, CS2500)

Responsible for this module:

- [Prof. Dr.-Ing. Achim Schweikard](#)

Teacher:

- [Institute for Electrical Engineering in Medicine](#)
- [Institute of Computer Engineering](#)
- [Institute for Robotics and Cognitive Systems](#)
- [Prof. Dr.-Ing. Achim Schweikard](#)
- [Prof. Dr.-Ing. Mladen Berekovic](#)
- [Prof. Dr. Philipp Rostalski](#)

Literature:

- Hertzberg et.al.: Mobile Roboter - Springer 2012
- Siegert: Robotik: Programmierung intelligenter Roboter
- Siegwart et.al.: Autonomous Mobile Robots - MIT Press, 2011

Language:

- offered only in German

Notes:

Admission requirements for taking the module:

- None (the competencies of the modules listed under

CS3600 - Lab class media and interaction design (PrakMedien)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

8 (Typ B)

Course of study, specific field and term:

- Bachelor Computer Science 2012 (compulsory), specialization field media informatics, 5th semester

Classes and lectures:

- Lab class media and interaction design (practical course, 6 SWS)

Workload:

- 170 Hours group work
- 30 Hours oral presentation (including preparation)
- 30 Hours written report
- 10 Hours in-classroom work

Contents of teaching:

- Requirements analysis
- System and media design
- depending on the project: text, image, video, audio and 3D animation as well as related tools and programming languages
- Media production and media programming
- Evaluation of the product
- Project documentation
- Project presentation

Qualification-goals/Competencies:

- The students have experienced a complete development process for the production of an interactive multimedia application.
- They know the various media-related methods and tools in practice.
- They are able to reflect on their own work critically.
- They know the advantages and problems of teamwork.

Grading through:

- programming project

Requires:

- Media Production and Media Programming (CS2601)
- Interaction Design (CS2600)
- Software Ergonomics (CS2200-KP04, CS2200)

Responsible for this module:

- [Prof. Dr.-Ing. Nicole Jochems](#)

Teacher:

- [Institute for Multimedia and Interactive Systems](#)
- MitarbeiterInnen des Instituts

Language:

- offered only in German

CS3702-KP04, CS3702 - Bachelor Seminar Informatics (BachSemInf)

Duration:	Turnus of offer:	Credit points:	Max. group size:
1 Semester	each semester	4 (Typ B)	15

Course of study, specific field and term:

- Bachelor Computer Science 2019 (compulsory), interdisciplinary competence, 5th semester
- Bachelor Computer Science 2016 (compulsory), interdisciplinary competence, 5th semester
- Bachelor Computer Science 2014 (compulsory), interdisciplinary competence, 5th semester
- Bachelor Computer Science 2012 (compulsory), interdisciplinary competence, 5th semester

Classes and lectures:

- Bachelor Seminar (seminar, 2 SWS)

Workload:

- 40 Hours written report
- 35 Hours private studies
- 30 Hours in-classroom work
- 15 Hours oral presentation (including preparation)

Contents of teaching:

- Familiarization in a scientific topic
- Working on a scientific topic and its answers for problems
- Presentation and discussion of the topic in English

Qualification-goals/Competencies:

- The students are able to analyze, judge and develop a scientific topic.
- They are able to present the results in a written documentation and in a talk in an scientific way
- They are able to present and discuss a scientific topic in English.
- They are able to classify and differentiate the topic in the wider academic context.
- They improve their language competency.

Grading through:

- oral presentation
- term paper

Requires:

- Tools for scientific practice (CS2450-KP02, CS2450)

Responsible for this module:

- Studiengangsleitung Informatik

Teacher:

- [Institutes of the Department of Computer Science/ Engineering](#)
- Alle prüfungsberechtigten Dozentinnen/Dozenten des Studienganges

Literature:

- Topic and literature are chosen individually.:
- :

Language:

- offered only in English

Notes:

<ul style="list-style-type: none"> • offered only in German 		

Notes:

This module is for bachelor medical informatics and bachelor computer science (compulsory field of application: bioinformatics or medical informatics) only an additional offer. It is not eligible for the study.

MA3400-KP04, MA3400 - Biomathematics (Biomathe)
Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Master Molecular Life Science 2023 (optional subject), mathematics / computer science, 1st semester
- Bachelor MES 2020 (optional subject), mathematics / natural sciences, 3rd semester at the earliest
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), mathematics, 5th or 6th semester
- Bachelor Medical Informatics 2014 (optional subject), medical computer science, 5th or 6th semester
- Bachelor MES 2014 (optional subject), mathematics / natural sciences, 3rd or 5th semester
- Bachelor Computer Science 2014 (compulsory), specialization field bioinformatics, 5th semester
- Master MES 2011 (optional subject), mathematics, 1st semester
- Bachelor Medical Informatics 2011 (optional subject), bioinformatics, 4th to 6th semester
- Master Computer Science 2012 (optional subject), specialization field medical informatics, 3rd semester
- Bachelor MES 2011 (optional subject), mathematics, 5th semester
- Bachelor Computer Science 2012 (compulsory), specialization field bioinformatics, 5th semester

Classes and lectures:

- Biomathematics (lecture, 2 SWS)
- Biomathematics (exercise, 1 SWS)

Workload:

- 55 Hours private studies and exercises
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Examples and elementary solution methods for ordinary differential equations
- Existence and uniqueness theorems
- Dependence of solutions on initial conditions
- Linear systems (in particular with constant coefficients)
- Higher-Order linear differential equations
- Qualitative theory of nonlinear systems
- In accordance to the rules of GSP of UzL

Qualification-goals/Competencies:

- Students are able to explain basic notions from the theory of ordinary differential equations.
- Based on examples, students are able to explain
- Based on theorems, students are able to give conditions under which
- Students are able to find explicit solutions of simple differential equations.
- Students are able to explain how solutions of differential equations can be analysed qualitatively.
- Students are able to present important models of the natural sciences which can be analysed by differential equations.

Grading through:

- written exam

Requires:

- Linear Algebra and Discrete Structures 2 (MA1500-KP08, MA1500)
- Linear Algebra and Discrete Structures 1 (MA1000-KP08, MA1000)
- Analysis 2 (MA2500-KP04, MA2500)
- Analysis 1 (MA2000-KP08, MA2000)

Responsible for this module:

CS3201-KP04, CS3201 - Usability Engineering (UsabUXEng)

Duration:

1 Semester

Turnus of offer:

each winter semester

Credit points:

4

Course of study, specific field and term:

- Bachelor Media Informatics 2020 (compulsory), media informatics, 5th semester
- Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization SSE, 5th semester
- Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization SSE, 5th semester
- Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester
- Bachelor IT-Security 2016 (optional subject), computer science, Arbitrary semester
- Bachelor Media Informatics 2014 (compulsory), media informatics, 5th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 5th semester
- Bachelor Medical Informatics 2011 (optional subject), software engineering, 4th to 6th semester
- Bachelor Computer Science 2012 (compulsory), specialization field media informatics, 6th semester
- Bachelor Computer Science 2012 (optional subject), central topics of computer science, 6th semester

Classes and lectures:

- Usability Engineering (lecture, 2 SWS)
- Usability-Engineering (exercise, 1 SWS)

Workload:

- 55 Hours private studies
- 45 Hours in-classroom work
- 20 Hours exam preparation

Contents of teaching:

- Introduction and motivation
- Cognitive Systems Engineering
- Software and Usability Engineering
- Ability-Based and Inclusive Design
- Interdisciplinary teams and social processes
- cost-benefit analysis
- Task analysis
- User analysis
- Organizational and contextual analysis
- Modeling and design of interactive systems
- Criteria for interactive systems
- Evaluation of interactive systems
- Summary

Qualification-goals/Competencies:

- Students are able to explain the basic user-centered development processes for interactive multimedia systems.
- They are able to apply and adapt basic processes for specific projects and needs.
- They are able to explain that these processes are influenced by formal und informal requirements as well as social structures and behaviors.

Grading through:

- written exam

Requires:

- Software Ergonomics (CS2200-KP04, CS2200)

Responsible for this module:

- [Prof. Dr. phil. André Calero Valdez](#)

Teacher:

- [Institute for Multimedia and Interactive Systems](#)
- [Prof. Dr. phil. André Calero Valdez](#)

Literature:

Language:

- offered only in German

Notes:

Replaces CS3201-KP04 Usability-Engineering.

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Successful completion of homework assignments as stated at the beginning of the course

Exam(s):

- CS3201-L1 Usability- und UX-Engineering, Klausur, 90min, 100% der Modulnote

CS3701 - Bachelor Project Computer Science (BacProjInf)			
Duration: 1 Semester	Turnus of offer: each summer semester	Credit points: 6 (Typ B)	Max. group size: 12
Course of study, specific field and term:			
<ul style="list-style-type: none"> Bachelor Computer Science 2012 (compulsory), interdisciplinary competence, 6th semester 			
Classes and lectures:		Workload:	
<ul style="list-style-type: none"> Bachelor Project Computer Science (project work, 4 SWS) 		<ul style="list-style-type: none"> 90 Hours group work 60 Hours in-classroom work 20 Hours written report 10 Hours oral presentation (including preparation) 	
Contents of teaching:			
<ul style="list-style-type: none"> Team-based planning and realization of a complete software/hardware project ranging from requirement engineering to installation while observing standards and deadlines 			
Qualification-goals/Competencies:			
<ul style="list-style-type: none"> Students have the communication competency to elucidate the system requirements with customers They have methodological competence to analyse complex tasks, to structure them into subtasks, and to implement them in team work They have the management competency to estimate the costs, to plan the activities, and to allocate the resources meeting the goals of the project They are able to integrate components into an overall application while ensuring quality They have the methodological competence to manage created artifacts and documenting implementations. They have the communication competency to write down and present (partial) results 			
Grading through:			
<ul style="list-style-type: none"> successful addressing of the project goals 			
Requires:			
<ul style="list-style-type: none"> Software Engineering II (CS3200) Software Engineering I (CS2300) Fundamentals of Computer Engineering (CS1200) Theoretical Computer Science (CS2000-KP08, CS2000) Algorithms and Data Structures (CS1001-KP08, CS1001) Programming (CS1000)

CS3990-KP15, CS3990 - Bachelor Thesis Computer Science (BSclnf)
Duration:

1 Semester

Turnus of offer:

each semester

Credit points:

15

Course of study, specific field and term:

- Bachelor Computer Science 2019 (compulsory), computer science, 6th semester
- Bachelor Computer Science 2016 (compulsory), computer science, 6th semester
- Bachelor Computer Science 2014 (compulsory), computer science, 6th semester
- Bachelor Computer Science 2012 (compulsory), computer science, 6th semester

Classes and lectures:

- Bachelor Thesis Computer Science (supervised self studies, 1 SWS)
- Colloquium (colloquium, 1 SWS)

Workload:

- 360 Hours research for and write up of a thesis
- 90 Hours oral presentation and discussion (including preparation)

Contents of teaching:

- investigating a given problem in informatics or application areas and developing a good solution
- colloquium to represent the results including a discussion with the referees

Qualification-goals/Competencies:

- The students can unassistedly solve a moderately difficult problem from the field of computer science with scientific methods based on the acquired professional knowledge.
- They are able to document their approach in a written thesis in a scientific style.
- They are able to present results in a scientific talk and defend them in a discussion.

Grading through:

- oral presentation
- Written report

Responsible for this module:

- Studiengangsleitung Informatik

Teacher:

- [Institutes of the Department of Computer Science/ Engineering](#)
- Alle prüfungsberechtigten Dozentinnen/Dozenten des Studienganges

Literature:

- : depends on subject

Language:

- thesis can be written in German or English

Notes:

Prerequisites for attending the module:
- see Academic Regulations and Procedures for Students

CS4172-KP04, CS4172 - Dependability of Computing Systems (ZuvelRSys)		
Duration:	Turnus of offer:	Credit points:
1 Semester	each summer semester	4
Course of study, specific field and term:		
<ul style="list-style-type: none"> • Bachelor Computer Science 2019 (optional subject), major subject informatics, Arbitrary semester • Bachelor Robotics and Autonomous Systems 2020 (optional subject), computer science, 5th or 6th semester • Bachelor Computer Science 2016 (optional subject), major subject informatics, Arbitrary semester • Bachelor Robotics and Autonomous Systems 2016 (optional subject), computer science, 5th or 6th semester • Bachelor IT-Security 2016 (compulsory), IT-Security, 6th semester • Bachelor Computer Science 2014 (optional subject), central topics of computer science, 6th semester • Bachelor Computer Science 2014 (compulsory), specialization field IT security and safety, 6th semester • Bachelor Computer Science 2012 (compulsory), specialization field IT security and safety, 6th semester • Master Computer Science 2012 (optional subject), advanced curriculum security, 2nd or 3rd semester • Master Computer Science 2012 (optional subject), specialization field software systems engineering, 3rd semester • Master Computer Science 2012 (optional subject), advanced curriculum parallel and distributed system architectures, 2nd or 3rd semester • Master Computer Science 2012 (optional subject), specialization field robotics and automation, 3rd semester 		
Classes and lectures:		Workload:
<ul style="list-style-type: none"> • Dependability of Computing Systems (lecture, 2 SWS) • Dependability of Computing Systems (exercise, 1 SWS) 		<ul style="list-style-type: none"> • 55 Hours private studies • 45 Hours in-classroom work • 20 Hours exam preparation
Contents of teaching:		
<ul style="list-style-type: none"> • Basic terms • General redundancy techniques • Fault diagnosis • Reconfiguration and recovery • Fault masking • Examples for fault-tolerant systems 		
Qualification-goals/Competencies:		
<ul style="list-style-type: none"> • The students are able to present the most important fault types in hardware and software and their abstraction to fault models. • They are able to elucidate the basic redundancy techniques (static and dynamic redundancy, hybrid forms etc.). • They are able to explain various methods for fault diagnosis, reconfiguration, recovery and fault masking. • They are able to describe typical application examples and sample fault-tolerant computers. • They are able to analyze fault tolerance techniques quantitatively by mathematical reliability models. • They are able to evaluate and compare suitable fault tolerance techniques and to select them for a given application area. 		
Grading through:		
<ul style="list-style-type: none"> • Written or oral exam as announced by the examiner 		
Responsible for this module:

Notes:

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful completion of exercise assignments as specified at the beginning of the semester

Module Exam(s):

- CS4172-L1: Dependability of Computing Systems, written exam, 90min, 100% of the module grade

CS4180-KP04, CS4180 - Security in Networks and Distributed Systems (SicherNet)
Duration:

1 Semester

Turnus of offer:

not available anymore

Credit points:

4

Course of study, specific field and term:

- Bachelor Medical Informatics 2014 (optional subject), computer science, 5th or 6th semester
- Bachelor Computer Science 2014 (optional subject), central topics of computer science, 6th semester
- Bachelor Computer Science 2014 (compulsory), specialization field IT security and safety, 4th semester
- Bachelor Computer Science 2012 (compulsory), specialization field IT security and safety, 6th semester
- Master Computer Science 2012 (optional subject), advanced curriculum security, 2nd or 3rd semester
- Master Computer Science 2012 (optional subject), advanced curriculum enterprise IT, 2nd or 3rd semester

Classes and lectures:

- Security in Networks and Distributed Systems (lecture, 2 SWS)
- Security in Networks and Distributed Systems (exercise, 1 SWS)

Workload:

- 60 Hours private studies
- 45 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Fundamentals of network security
- Attacks
- Cryptology
- Acquire a basic understanding of formals and organizational aspects of network security (IT-Grundschutz, ITIL security)
- Integrity & Authentication, Authorization, and Accountability
- Key Distribution
- Certificates and Digital Signatures
- Protocols (Physical & Data-Link, Network & Transport, Application Layer)
- Firewalls
- IT Grundschutz & ITIL
- Societal aspects

Qualification-goals/Competencies:

- Acquire a basic understanding of security issues (important terms, security objectives, communication models, network security models, attacker models, difference between safety and security)
- Understand the different security risks in networks and distributed systems
- Learn about the different types of attacks and their classification
- Understand the basics of cryptography: substitution ciphers (Caesar, Vigenère, etc.), Enigma, One-Time Pad, stream ciphers (structure, RC4), block ciphers (Feistel Networks, DES, AES), operation modes (ECB, CBC, PCBC, CFB, OFB, Counter), padding, asymmetric systems (Diffie-Hellmann, RSA)
- Understand integrity, authentication, authorization, and accountability
- Understanding of digital certificates, public key infrastructures and learn about important standards such as X.509
- Learn about important security solutions on different layers of the ISO/OSI stack
- Understand firewalls
-

Grading through:

- Written or oral exam as announced by the examiner

Responsible for this module:

- [Prof. Dr. Stefan Fischer](#)

Teacher:

- [Institute of Telematics](#)
- [Prof. Dr. Stefan Fischer](#)

Literature:

- William Stallings: Cryptography and Network Security: Principles and Practice - Prentice Hall, 2013

Language:

- offered only in German

MA1600-KP04, MA1600, MA1600-MML - Biostatistics 1 (BioStat1)
Duration:

1 Semester

Turnus of offer:

each summer semester

Credit points:

4

Course of study, specific field and term:

- Bachelor CLS 2023 (compulsory), mathematics, 2nd semester
- Bachelor Biophysics 2024 (compulsory), Elective Computer Science, 4th semester
- Bachelor Nutritional Medicine 2024 (compulsory), mathematics / natural sciences, 4th semester
- Bachelor MES 2014 (optional subject), mathematics / natural sciences, 3rd semester at the earliest
- Bachelor Computer Science 2019 (optional subject), Extended optional subjects, Arbitrary semester
- Bachelor Computer Science 2019 (compulsory), Canonical Specialization Bioinformatics and Systems Biology, 6th semester
- Bachelor Medical Informatics 2019 (compulsory), medical computer science, 6th semester
- Bachelor MLS 2018 (compulsory), life sciences, 6th semester
- Bachelor Nutritional Medicine 2018 (compulsory), mathematics / computer science, 6th semester
- Bachelor CLS 2016 (compulsory), mathematics, 2nd semester
- Bachelor CLS 2010 (compulsory), mathematics, 2nd semester
- Bachelor Computer Science 2016 (optional subject), advanced curriculum, Arbitrary semester
- Bachelor Computer Science 2016 (compulsory), Canonical Specialization Bioinformatics, 4th semester
- Bachelor MLS 2016 (compulsory), life sciences, 6th semester
- Bachelor Biophysics 2016 (compulsory), Elective Computer Science, 4th semester
- Bachelor Nutritional Medicine 2016 (compulsory), mathematics / computer science, 6th semester
- Bachelor Medical Informatics 2014 (compulsory), medical computer science, 4th semester
- Bachelor Computer Science 2014 (compulsory), specialization field bioinformatics, 6th semester
- Master MES 2011 (advanced curriculum), biophysics and biomedical optics, 2nd semester
- Bachelor Medical Informatics 2011 (compulsory), medical computer science, 4th semester
- Master Computer Science 2012 (optional subject), specialization field bioinformatics, 2nd or 3rd semester
- Master Computer Science 2012 (compulsory), advanced curriculum stochastics, 2nd semester
- Bachelor Computer Science 2012 (optional subject), specialization field bioinformatics, 6th semester
- Bachelor MLS 2009 (compulsory), life sciences, 6th semester
- Bachelor MES 2011 (optional subject), medical engineering science, 6th semester
- Bachelor Molecular Life Science 2024 (compulsory), mathematics / computer science, 4th semester

Classes and lectures:

- Biostatistics 1 (lecture, 2 SWS)
- Biostatistics 1 (exercise, 1 SWS)

Workload:

- 66 Hours private studies
- 39 Hours in-classroom work
- 15 Hours exam preparation

Contents of teaching:

- Descriptive statistics
- Probability theory, including random variables, density, and cumulative distribution function
- Normal distribution, other distributions
- Diagnostic tests, reference range, normal range, coefficient of variation
- Statistical testing
- Sample size calculations
- Confidence intervals
- Selected statistical tests I
- Selected statistical tests II
- Linear simple regression
- Analysis of variance (one-way-classification)
- Clinical trials
- Multiple Testing: Bonferroni, Bonferroni-Holm, Bonferroni-Holm-Shaffer, Wiens, hierarchical Testing

Qualification-goals/Competencies:

- With regard to the roles of GSP of the University of Lübeck and of the DFG-guidelines the student were able to work with the following statistical methods: The students are able to calculate descriptive statistics.
- They are able to calculate quantiles and surfaces of the normal distribution.
- They are able to explain terms of diagnostic testing, such as sensitivity or specificity.
- They are able to list the basic principles of statistical testing, sample size calculation and confidence interval construction.

- They are able to carry out a set of elementary statistical tests, such as t-test, test of proportions, X² independence test, and to interpret the results.
- They are able to explain the basic principles of linear regression.
- They are able to apply the linear simple regression.
- They are able to explain the basic idea for the one-way analysis of variance (ANOVA).
- They are able to explain the results table for the one-way and two-way ANOVA.
- They are able to interpret the results of the ANOVA.
- They know the basic principles of clinical therapeutic studies.
- They know the assumptions that need to be fulfilled for the application of specific statistical tests.
- They are able to calculate simple adjustments for multiple comparisons.

Grading through:

- written exam

Is requisite for:

- Module part: Biostatistics 2 (MA2600 T)
- Biostatistics 2 (MA2600-KP07)
- Biostatistics 2 (MA2600-KP04, MA2600)

Responsible for this module:

- Prof. Dr. rer. biol. hum. Inke König

Teacher:

- [Institute of Medical Biometry and Statistics](#)
- Prof. Dr. rer. biol. hum. Inke König
- MitarbeiterInnen des Instituts

Literature:

- Matthias Rudolf, Wiltrud Kuhlisch: Biostatistik: Eine Einführung für Biowissenschaftler - 1. Auflage, Pearson: Deutschland
- Lothar Sachs, Jürgen Hedderich: Angewandte Statistik: Methodensammlung mit R - 15. Auflage, Springer: Heidelberg

Language:

- offered only in German

Notes:

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Active and regular participation in the exercise groups as specified at the beginning of the semester.

Module exam:

- MA1600-L1: Biostatistics 1, written exam, 90 min, 100 % of module grade
