and Biobanking

Dr. Mark DIVERS

Mark Divers is director of Karolinska Institutet Biobank, in Stockholm, Sweden, where he has led the implementation of large-scale biobanking for over 10 years.

He has a background of 25 years in the pharmaceutical industry most of which was involved in building, leading and developing R&D infrastructure to serve medical research.

He has a PhD in the molecular biology of antibiotic resistance in hospital bacteria, and has also researched on the molecular biology of antibiotic production.

His current interest is in the impact and value of biobanking to support research that improves public health.
